At the first sign

Treatment of 'Colds and Chills' must be prompt if it is to be effective.

Most of us know the first signs only too well. The prickly feeling in the back of the throat, the cold queasy sensation in the abdomen . . . . these are the signals which say **'bed, hot water bottle, hot drink, and ANADIN.'**

urnal of the Royal College of Nursing

The fruit that finishes the job you began

The dedicated nurse, the nurse with a vocation, knows no more humbling yet heart-lifting moment than when her patient passes the crisis of a serious illness; or when the will to live triumphs over the hazards of a major operation; or when she puts a new-born baby into its mother's arms.

It is then that a nurse knows the reward for all the hours of vigilance, the days and nights of exhausting routine and sheer hard work that go into her job.

When your patient is getting better

But a nurse's job doesn't end there. As the doctor's invaluable aide-de-camp, she must go on after the drama has passed, leading the patient gently back to health.

She knows that this is the time when vitamin C is *essential*, because it helps to build red blood cells and aids the quick healing of wounds, both internal and external. It fights the fatigue and lassitude that follows illness—and, even more important, it builds up the body's resistance and goes a long way towards preventing recurrence of ill-health.

Ribena every day—to keep fit

As the nurse knows, the body is unable to store vitamin C, as it does other vitamins; and so it becomes imperative that this vital component of health should be taken *every day*. This is why Ribena is the *nurse's* aide-de-camp. Ribena—made from blackcurrants, the fruit with the highest *natural* vitamin C content—is the most delicious tonic for convalescents, as well as for *maintaining* the health of your patients. It's not enough to nurse them back to fitness—make sure they *stay* fit by drinking Ribena every day.

It's not only a tonic—it's a treat!

Being entirely free from cellular material, Ribena does not upset the most delicate digestion—so even very small patients, from as early as the fourth week onwards, should have their vitamin C in the form of this delicious drink. During childhood generally, the vitamin C requirement of the growing organism is much higher, comparatively, than during adult life, so that the routine use of Ribena is obviously of great value. Children don't set up an automatic resistance to Ribena on the grounds that it's a medicine because "it's doing them good"—on the contrary, they love its fruit flavour, and think of it as a special treat. Children's nursing is made considerably easier with the help of Ribena.

You need it, too

Nurses too—because they are doing such an important job in the community, and on which necessarily makes immense demands upon their vitality—must remember that they themselves need daily vitamin C. Ribena is the answer—as essential a part of a nurse's equipment as her thermometer.

So remember to advise all your patients (the healthy ex-patients and the ones you are still tending) to keep a bottle of Ribena always in the house. Tell them to take it in milk, or in hot or cold water, to ensure that they have their all-important *daily* supply of vitamin C.

Ribena

(a) Complete General Training School for male and female Student Nurses.
(b) Parent School of Group Scheme for General Training.
(c) Assistant Nurse Training School for male and female Pupil Assistant Nurses and by Central Midwives' Board as Part I Midwifery Training School.

Salary £745 x £20 (6)—£865, less residential charges of £193 per annum. Nurses' and Midwives' Whitley Council conditions of service and Health Services Superannuation Scheme applicable.

Applications, giving full particulars of age, education, qualifications and experience, with names of three referees, should be made as soon as possible to Secretary, Birmingham (Selly Oak) H.M.C., Oak Tree Lane, Selly Oak, Birmingham, 29, from whom further information concerning the hospital may be obtained. (2881)

Mid-Sussex Hospital Management Committee
CHAILEY HERITAGE (CRAFT SCHOOL AND HOSPITAL)
NORTH COMMON, CHAILEY, Nr. LEWES

Assistant Matron for hospital side. 300 beds—orthopaedic and physically handicapped children. Candidates must be S.R.N. Orthopaedic and housekeeping experience an advantage. Whitley Council conditions.

Apply to Matron stating age, qualifications and experience with names of three referees. (2968)

The United Newcastle upon Tyne Hospitals
ROYAL VICTORIA INFIRMARY

Applications are invited for appointment of **Night Sister** in the Children's Department. It is desirable that applicants should be S.R.N. and S.R.C.N.

Applications giving details of experience and two names for reference purposes, should be addressed to the Matron, Royal Victoria Infirmary, Newcastle upon Tyne. (2934)

MRS. COWARD'S TRAINED
CO-OPERATIVE INSTITUTE

Applications are invited for the **Administrative Sister** as soon as

Applicants should have experience routine and must be State Registered

Salary according to experience residential emoluments.

Applications should be addressed Secretary to the Committee, 62 St. Square, S.W.1.

UNITED MANCHESTER HOSPITALS
SAINT MARY'S HOSPITAL
MANCHESTER

Administrative Sister required office and home duties. Must have and S.C.M. Certificates.

Salary according to Whitley Council mendations.

Applications, with details of experience two names for reference, to the Matron, whom particulars may be obtained.

QUEEN CHARLOTTE'S AND
CHELSEA HOSPITALS
Chelsea Hospital for Women,
Street, S.W.3.
HOME SISTER.
Queen Charlotte's Maternity
Goldhawk Road, S.W.6.
MIDWIFERY SISTER.

Apply in writing to Matron days.

MRS. COWARD'S TRAINED
CO-OPERATIVE INSTITUTE

Applications are invited for the **Administrative Sister** as soon as

Applicants should have experience routine and must be State Registered

Salary according to experience residential emoluments.

Applications, together with full experience, age, etc., should be sent the Secretary to the Committee, George's Square, London, S.W.1.

COUNTY BOROUGH OF CROYDON
ASSISTANT WARDEN

Applications are invited from tered Nurses for this resident at a hostel for 95 elderly men

Salary scale £610 p.a. by £20 less £176 p.a. for residence. rights safeguarded for officers from the Health Service, and salary will have regard to previous ation.

The post is pensionable, subject examination.

Application forms from Chief Officer, 43 Wellesley Road, Croydon

Closing date 1st December, 1956.

E. TABER

ASHFORD HOSPITAL
LONDON ROAD, ASHFORD
MIDDLESEX
(General Hospital—600 beds)

Applications are invited for **Warden.**

This vacancy is for a third the Nurses' Home and offers good to a person taking up this type

Commencing salary £350 to according to ability, less £152 p.a. lodging, etc. 48-hour week.

Details of the post and duties given on application to Matron.

NEWTON ABBOT HOSPITAL
NEWTON ABBOT, S. DEVON

Applications are invited from qualified Registered Nurses for the **Housekeeping Sister.**

Candidates should possess a good tive background, have considerable in housekeeping and be able to 320 main meals served daily.

Applications, stating fullest experience and qualifications, details of age, nationality and addresses of three referees, without delay to the Group Secretary District Hospital Management Torbay Hospital, Torquay, S. Devon.

BRISTOL ROYAL HOSPITAL
FOR SICK CHILDREN
ST. MICHAEL'S HILL, BRISTOL

Required: **Night Sister** (or R.S.C.N., S.R.N., or R.S.C.N., S.R.N.)

Applications giving details of and experience, together with referees, to the Matron.

ROYAL FREE HOSPITAL
GRAY'S INN ROAD, W.C.1

Night Sister required for 1957.

Salary according to Whitley Council Seven nights off are given in Excellent experience.

Apply to Matron, giving details training and subsequent experience with the names of two Matrons purposes.

JOURNAL OF THE ROYAL COLLEGE OF NURSING

NURSING TIMES

Macmillan and Company Limited, London — Friday, November 23, 1956

EDITOR: MISS M. L. WENGER, S.R.N., S.C.M., DIPLOMA IN NURSING, UNIVERSITY OF LONDON

Objectives for the Profession

WHILE it may be better to travel hopefully than to arrive, it is as well to know in what direction one is travelling and toward what objectives. The Royal College of Nursing booklet *Observations and Objectives*, announced last week, sets out against the social background of the time and the advances in medical knowledge a number of objectives for the profession.

Considering first the problem of staff shortages in the National Health Service and particularly in the mental hospitals, the memorandum emphasizes the need for team nursing—that is, the qualified nurse as the leader, but one actively participating with her team of students, assistants and auxiliaries in the care of the patients. Enrolled assistant nurses should provide a large proportion of the basic care under the direction of the State-registered nurse, and the number of hospitals approved as training schools for assistant nurses should be increased, while the number of nursing schools approved by the General Nursing Councils for the preparation of students for the State Registers should be reduced. The two types of training, each with minimum standards for admission and an educational programme of training, should increase the numbers of staff, and by good selection reduce the wastage due to candidates failing to complete a training unsuited to their particular capacities. To assist the serious shortage of staff in mental hospitals the memorandum recommends that a grade equivalent to that of the assistant nurse in general hospitals should be employed in mental hospitals.

With increased numbers of staff obtained through the two types of training, by means of which every young man and woman who has the desire to nurse can take the one most suited to them, the College calls for careful selection of student nurse candidates in place of the indiscriminate recruitment by many hospitals today with resultant high wastage rates. Further, while recognizing that the student nurse gains essential practical experience by giving service in the hospital wards, it is vitally important not to subordinate training requirements to staffing needs. A training agreement should make clear the obligation of the school of nursing to the student, as well as the student's obligation to the school. The value of further educational courses for qualified nurses is also emphasized and hospital authorities are urged to release their staff to attend refresher courses.

The Royal College of Nursing does not suggest that all nurses, or even the majority, should have a university preparation, but seeks the establishment of a university degree course which would combine the essential training for State-registration with the academic discipline and broad outlook offered by university life and study. This would attract to the profession those who at present find the training intellectually unsatisfying.

Conditions of service and salaries for nurses are considered in the College memorandum and the existing pattern of salary structure is considered unsatisfactory. Instead of the present system where, for example, the salary of a matron is based solely on the number of beds in the hospital, it is proposed that nurses' salaries should be related to three factors: qualification, function and responsibility. They should also stand comparison with those of workers in other professions.

Hours of duty and regular off duty, known well in advance, are matters which could already be satisfactorily arranged in each hospital, but three months' special leave after seven years' continuous service is proposed for ward sisters and senior grades, while leave with pay for attendance at professional conferences is also sought.

Now that the nursing profession is recognized as having a national and international contribution to make it is the more important that there should be opportunities for nurses to prepare themselves to serve on committees, boards of management, on national advisory councils and in the Ministries. While no nurse in this country is yet a Member of Parliament, the profession is expected to contribute to the preparation of Parliamentary Bills and regulations relating not only to nurses and nursing, but on health and social legislation. Administration, formulation of policy and planning of all kinds, are spheres in which nurses may well expect to play an even greater part in the near future.

Without research the work of a profession must be incomplete. The Council of the Royal College of Nursing,

therefore, propose to establish in due course a research body to examine the problems of the nursing profession and decide priority as to the need for research.

If these objectives are the common aim of all members of the organized nursing profession in this country the rate of progress toward them should be rapid. But they cannot be achieved without unity of endeavour, the support of the medical profession and the interest of the public.

For the new B.B.C. television programme —Family Affairs— a sister and student nurse at University College Hospital discuss one of the babies with Mrs. Beryl Radley, producer of the series.

Topical Notes

Gifts for Hungary

LADY LIMERICK, vice-chairman of the British Red Cross Society executive committee, just returned from Vienna and a tour of refugee camps in Austria, said at a press conference on Tuesday that three convoys of 15 vehicles each are being sent into Hungary each week for one month by the Society. Asked if nurses were needed, Lady Limerick said " Not at the moment, since most of the refugees now coming over the border are young and able-bodied, but the Red Cross has a list of volunteer nurses to call on in the future if needed." As we go to press the British Red Cross fund for Hungarian relief has reached £160,000. A depot for Red Cross supplies has now been opened in Budapest from which urgent supplies were being distributed. Money is of course, the essential need, more particularly as the Red Cross is arranging to buy supplies of medical needs and foodstuffs in Austria. A popular illustrated periodical is devoting the whole of the proceeds of one week's sales to the Red Cross fund for Hungarian relief.

Maternity Series on Television

THE EDITOR OF WOMEN'S PROGRAMMES, BBC Television, has announced, among a number of interesting developments, a series on maternity entitled *Family Affairs* which will be prepared with the co-operation of University College Hospital, London, in 12 instalments starting on New Year's Day. The series aims to show the importance of antenatal care, to dispel fears about childbirth and to spread an understanding of enlightened methods of caring for mother and baby. The value of the father's interest and understanding during pregnancy will be touched on in the series, in which silent film will be supplemented by studio interviews with members of the hospital staff. The producer of this feature, Mrs. Beryl Radley, has spent a fortnight in University College Hospital watching the department at work and will spend another two weeks there in filming the scenes to be used. Miss Gwen Farrow (Mrs. Kartun), who is a State-registered nurse and has practised both midwifery and health visiting, will introduce and link each of the programmes in the series; she herself recently had her second baby in University College Hospital.

Poliomyelitis Vaccine

THE MINISTER OF HEALTH has informed local authorities of the initial arrangements to be made for the resumption of vaccination against poliomyelitis. The first issue of vaccine, to be distributed to local health authorities in the last week of November, will be enough to vaccinate the 27,000 children in England and Wales who received only one injection before vaccination was suspended at the end of last June. Arrangements should be made to give second injections to as many of these children as possible in the authority's area during December. Any vaccine remaining should then be used to give first injections as soon as possible to further children who were registered for vaccination earlier in the year. Children may be selected for this purpose in any way convenient to the authority. It is hoped that regular supplies of the vaccine will become available from the middle of January 1957 onwards, and a further circular will be issued shortly on the arrangements for the vaccination of the remaining registered children.

Carols by Candlelight

THE ANNUAL CAROL SERVICE arranged at All Souls Church, Langham Place, by the North Western Metropolitan Branch of the Royal College of Nursing will take place on Tuesday, December 18, at 7 p.m. This will be the seventh consecutive year in which the service has been held and nurses in all types of work welcome this opportunity of sharing together in joyful recognition of the advent of Christmas.

Marie Curie Memorial Foundation

THE POSSIBILITY of a night-nursing service for cancer patients at home was being investigated by the Marie Curie Memorial Foundation and 195 medical officers of health, Mr. Raven, chairman of the council, told members at the annual general meeting of the Foundation, held in the London home of Lord and Lady Brabazon of Tara on November 14. He also believes it is " our duty to inform

the youngsters of this country of the effects of excessive smoking" and reported that letters of inquiry were being sent to headmasters in three counties in Southern England. Publicity giving information on cancer symptoms, treatment and research had been circulated by talks, leaflets and telephone. In Hull, individual members of the public could call a central office and receive a short talk on cancer. The effects of this method was being investigated by means of questions sent to consultants and general practitioners in the area. Miss Pat Hornsby-Smith, Parliamentary Secretary to the Ministry of Health, said that the increasing activities of the foundation in providing special homes for cancer patients and helping in research proved that voluntary organizations were still needed to supplement the National Health Service. Cancer was probably the greatest medical problem at the present time, and the Medical Research Council was spending £300,000 annually on cancer research.

STUDENT NURSES SPEECHMAKING CONTEST

Left: *a general view of the audience during the contest with the platform party occupying the front row, and* below: *Miss Erith Davies of Swansea General Hospital receiving the Cates trophy from Councillor Robert H. Sharpe, mayor of St. Marylebone, with, centre, Miss G. M. Godden.*

MISS Erith Davies, student nurse at Swansea General Hospital, won the Cates Trophy for speechmaking at the Royal College of Nursing on November 16. The 12 competitors could choose their own subject for the final of the contest, and Miss Davies chose 'Singing'. Miss E. J. McMullen, of the Orthopaedic Hospital, Greenisland, Northern Ireland, was the runner-up; her subject was 'This Diminishing World'.

The chair was taken by the Rev. S. H. Evans, M.A. B.D., Dean of King's College, University of London. The panel of judges consisted of: Miss K. Bird, lately co-principal of Benenden School, Benenden, Kent; Mrs. Iain Macleod, who is a gold medallist of the Royal Poetry Society, and wife of the Minister of Labour; Mr. F. W. Wyeth, B.SC., borough education officer, Willesden.

During the interval while the judges retired to consider their verdict, the large audience of over 300 student nurses from all parts of the United Kingdom and a few privileged guests were addressed by the president of the Royal College of Nursing, Miss G. M. Godden, O.B.E., who welcomed members of the Student Nurses' Association and assured them of the very great interest the Council took in all their activities. Miss R. A. Lucas, chairman of the Central Representative Council of the Student Nurses' Association, and Miss A. H. B. Jarvis, vice-chairman, also spoke.

The Cates trophy was presented to the winner by the Mayor of St. Marylebone, Councillor Robert H. Sharp, J.P., F.I.P.A. Mr. Wyeth, on behalf of the judges' panel, complimented all the entrants; one or two excellent speeches had, unfortunately, slightly exceeded the time limit. On occasions of this kind, he said, it was perhaps inevitable that speakers should memorize at least part of their speeches, but the art lay in disguising the fact that they had been memorized, so that they appeared spontaneous and unrehearsed. There should be form and shape in a speech, and this the winner whom they now congratulated had achieved.

Miss Davies, who has nearly completed her second year's training, spoke with true Celtic fervour and flow of oratory on the subject of singing. She succeeded in conveying graphically the very special place it occupied in the life of her country. It would not be true to say that everybody in Wales was a singer, but everybody was eager to talk about singing and music. This small country could even boast a national opera company of its own. There was not only the drama of tremendous choruses, there was also "the solitary art of poetry", and the speaker worked up to a dramatic climax with a vivid description of the last Eisteddfod.

The Mayoress of St. Marylebone was asked to draw the names of the two hospital Units of the Association who would be entitled to send a Student Nurses' Association representative to the International Council of Nurses Congress in Rome next year. The lucky Units were those of St. Luke's Hospital, Guildford, and Bromley Hospital, Bromley, Kent.

Over 40 Units also presented generous contributions during the afternoon to Miss Godden, for the sum required by the College to provide new chairs for the Cowdray Hall. Other Units had already sent donations.

Votes of thanks to the judges, the Mayor and Mayoress and to the chairman were proposed respectively by: Miss J. Beazley, Royal Surrey County Hospital, Guildford; Miss J. Carliss, New Cross Hospital, Wolverhampton, and Miss E. Wilson, Rochdale School of Nursing, Rochdale.

* * *

The finals of the Speechmaking Contest for the Cates Trophy were preceded by a lively and interesting morning session of reports by a number of members of the study visit to Denmark arranged by the Association during the

(*continued on page 1205*)

FREEDOM AND AUTHORITY IN EDUCATION

by M. V. C. JEFFREYS, C.B.E., M.A., Professor of Education and Director of the Institute of Education, Birmingham University.

"DRILL the pupils in the right way of sitting—upright, square to the desk, the left hand steadying the slate or paper, the pencil held some distance from the point, the fingers grasping it, but the hand turned so that the thumb is upwards and the wrist so free that a line of considerable length may be drawn by one continuous movement."[1]

It would be a useful exercise to guess the date of publication of the book from which this passage comes. Additional clues are that the book discusses object lessons and also refers to phonetic and look-and-say methods of reading.

The following passage is from a more recent source. The contrast of spirit is obvious.

"For a child to be free, the first essential is that he should move easily. But I knew of no way of achieving this; so I set about trying to get freedom of movement in the arts in the hope that personality would develop thereby. I introduced the children to unlimited colour, paper and pencils, to clay in big pieces in a room to itself where it did not matter whether the clay stuck on the ceiling or floor—to big mimes and massed movements (the channel of dramatic feelings) and to music, in a happy, informal and contented setting."[2]

It would be a mistake to exaggerate the change in classroom atmosphere during the last 50 or 100 years, and it is as well to reflect that freedom in education is no new idea. Nevertheless, these two passages serve to remind us that a fairly considerable change has taken place. The second belongs to the school world that we know, though the writer's attitude may be a shade too progressive for some of us. But the first does not belong to our world at all.[3]

I am not concerned, however, to estimate how much the teaching of art has been emancipated. More important than that, I think, is to point out that freedom and authority are not alternative principles, in education or in life generally. We should be making a great mistake if we pictured the development of educational method as a simple transition from 'authority' to 'freedom'. And, since the relation between freedom and authority is in principle the same in education as in social and political life, it may be useful to look first at the problem in general terms.

Truth—and Freedom

When Thomas Jefferson, the author of the Declaration of Independence, founded the University of Virginia, he chose this verse from St. John's Gospel as the motto of the University: "Ye shall know the Truth, and the Truth shall make you free". The whole essence of the problem of freedom and authority is in these words; for they imply that there is a truth to be known. Our freedom is not to ordain what shall or shall not be true, to make today's falsehood tomorrow's truth. The point was neatly made by the philosopher Bosanquet when he said: "You can make a true proposition, but you cannot make a proposition true."

Within each one of us as an individual there is always tension, if not conflict, between liberty and authority. The individual cannot be a law unto himself, but must recognize a law, not made by him but laying a claim upon him, through which alone he can hope to fulfil his nature. The condition of human creativeness is the acceptance of man as creature. "Authority and liberty", as Sir Henry Hadow once put it, "are like the centripetal and centrifugal forces which keep the earth in its orbit. Take away the centripetal, we should wander into outer darkness and perish of cold; take away the centrifugal, we should fall into the sun and perish of combustion. Our existence depends on a due balance between them . . ."[4]

This bi-polar tension between liberty and authority occurs not only in the field of political and moral conduct, but also in that of intellectual activity and the acquisition of skill. Whether we are painting a picture, composing a symphony, constructing a philosophy, managing a home, or governing a province, our mastery of the situation depends upon our respecting both the nature of our material and the proved ways of using it. We must learn to obey the rules and assimilate traditions before we can improve upon them.

Supernatural Values

The tension between individual liberty and social authority has become increasingly acute in modern history. In ancient and mediaeval times custom ruled human life. Custom was a kindly tyrant inasmuch as it restrained the individual's centrifugal impulses and softened the pressure of the state upon the individual. And behind the authority of custom was the assumption that truth and right have their source beyond human systems. So long as men believe that the ultimate values are, in this quite literal sense, supernatural, they must recognize at least a moral restraint upon the greed of individuals and the tyranny of the state.

Perhaps the most important political fact about the modern world is the failure to maintain the authority of supernatural values. The great ideological revolution of modern times is the emergence of philosophies that can be broadly called naturalistic, a logical result of which is the absolute individual and the absolute state.

Christian philosophy and the metaphysical idealism of Plato are both 'supernatural' in the sense in which that word has just been used. In contrast, the naturalism[5] of the 17th and 18th centuries, borne on the advance of science, had as its basic idea that man is part of nature, to be fully comprehended in terms of nature. Naturalism has two branches, rationalist and romantic. The one stresses the power of reason to understand and perfect nature, while the other stresses the essential rightness of spontaneous development according to nature. Both lend themselves readily to the notion that man can, of his own

Inaugural lecture at a course for nurse administrators held at the Royal College of Nursing Centre of Education, Birmingham.

natural resources, perfect himself and society.[6]

For that very reason, naturalism lends itself also to doctrines of unbridled individualism and totalitarianism. For there is no longer any higher power to recall a man to his duty to his neighbour or the state to its responsibilities as a trustee. Appeals to reason and nature are powerless to restrain either excess. Free competition can be presented as a law of nature, and reason can argue that the happiness of each will add up to the happiness of all. Equally it can be argued that the individual can have no meaning apart from the community that gave him birth and shapes his mind.[7]

The emergence in history of the idea of the responsible individual was a slow process, with origins at least as ancient as the Hebrews and the Greeks.[8] The effectiveness of the individual as such in European history was a result, first of the Renaissance and Reformation[9], but chiefly of the Industrial Revolution, which gave unlimited opportunity for competitive enterprise and invited a theoretical justification.

Acceptance of the Welfare State

The classic statements of individualism by the *laissez-faire* economists and the utilitarian philosophers have not been able to stand against the pressure of history. Every political party in every country today has to accept a measure of state intervention that would have horrified Adam Smith and Herbert Spencer. But, though the modern world is forced to accept the welfare state in some form or other, the individualistic spirit (meaning by that the notion that the individual has a right to be a law unto himself and to pursue his own ends in his own way) is by no means a spent force in the life of civilized societies, and can be an embarrassment to democracy.

Individualism is a doctrinal hypertrophy of the just liberty of the individual, and is possible only when the supernatural sanctions have given way to a naturalistic creed. Of more concern to most of us is the opposite inflation of the just authority of government into the omnipotent state. Totalitarianism is an even more modern development than individualism, and equally presupposes a naturalistic philosophy. Its essence is that the state is not merely the trustee but the creator of right values, and from the state there is no appeal, whether to God, custom, reason, or private judgement.

Historically, totalitarianism is a result of the growth of political nationalism and of economic struggle, between nations and between classes. It is in fact an answer to the problem of the mass organization of men for conflict in an age of knowledge and technical skill. Modern economic and political struggle cannot be conducted by means of ignorant hordes like the slaves that built the pyramids. Therefore there must be a doctrine, reinforced by all the powerful instruments of propaganda, which will make men deliver themselves up, body and soul, to the state or the party. Modern totalitarian doctrines derive, in one form or another, from Hegel's mystical idea of the state. For him the state was the manifestation of objective reason, and the individual—in himself irrational, egotistic, appetitive—could become rational only by absorption in the state.

In contrast with individualism and totalitarianism stands that kind of society that we call democracy, whose essential and complementary principles are that the individual is responsible to the community and that the state is the trustee, not the creator, of ultimate values. No group or party can claim the monopoly of truth or the right to coerce a dissenting minority. That is the great strength—and in another sense the great weakness—of democracy.

If individualism and totalitarianism both imply a naturalistic creed, it is no less true that democracy presupposes supernatural sanctions. Only so long as the ultimate values are thought of as having their source beyond human systems, only so long as an authority is acknowledged to which governors and governed alike are answerable, is there protection against the abuse of power —whether of the unfettered individual or of the unlimited state. It cannot be too much insisted that the ultimate foundation of democracy is not the sovereignty of the people but the sovereignty of God.

Our primary concern, however, is with education. It is natural to ask what influence the political extremes of individualism and totalitarianism have had on education. In one sense this is obvious enough. The apostles of *laissez-faire* held that parents should be free to educate their children or not, as they pleased.[10] On the other hand the modern absolute state has deliberately used education as an instrument for inculcating obedience. This was the express purpose, in the second half of the 19th century, of Prussian education, of which Herbart was the priest and Nietzsche the prophet; and it has been the purpose of all totalitarian regimes since then.

In another sense, however, the question is more complicated. If we are thinking of the methods of education, we shall look in vain for 'free expression' in the English schools of 150 years ago or for Prussian repression in the Soviet schools of today. It is a curious and ironical fact that the heyday of 'freedom in education', in this country and more markedly on the continent[11], came soon after World War 1, when the notion of the unfettered individual as a political possibility had been dead for half a century. There is irony, too, in the ambiguity which totalitarian education cannot escape, owing to the necessity for compromising with accepted educational doctrine and democratic principles of government. Thus the totalitarian state borrows progressive educational methods just as it borrows the forms of democratic political procedure. Both can be used as channels of propaganda.

Democratic Education

It is with what we may call democratic education that we are chiefly concerned. Democratic education involves two principles. The first, which need not detain us because it is now universally conceded, at least in theory, is the principle of equality; the principle, that is, of suitable educational opportunity for all. The second is the principle of responsibility, in respect both of the aim and the method of education. Not only is it the supreme purpose of education to produce responsible citizens, but it is of the very nature of the educational process that the pupil, in a sense, must educate himself. No one can learn for another; no one can force another to learn; one can only help people to learn, though one can do something to make them want to learn.

Moral responsibility contains two elements. On the one hand a responsible person is a free agent in the sense that he acts voluntarily and not under compulsion. On the other hand, he is not free to follow any whim or impulse in defiance of reason and humanity. Rather, he recognizes certain standards of conduct and accepts them as good. His moral freedom lies in acknowledging an authority that commends itself to his reason and conscience.

With this very rough definition of moral responsibility in mind, I would ask you to recall those two contrasted passages on the teaching of art, with which I began. Ever since education has been systematically thought about and discussed, people have been aware of a basic psychological problem—whether learning is an active process of assimila-

tion and growth by the child, or a passive process of receiving an imprint stamped by the teacher. On the one hand we think of the words of Froebel: " All the child is ever to be and to become lies however slightly indicated in the child and can be attained only through development from within outwards." Against that stands the opinion of Helvetius that man is nothing but the product of his education—an opinion enshrined in the famous words: " *L'education peut tout.*"[12]

It would be tedious to trace the swings of the pendulum of educational thought on this issue. The idea that learning is essentially active is at least as old as Plato and Aristotle, was reaffirmed by Thomas Aquinas[13], and was developed by Rousseau, Froebel and John Dewey. Locke, Helvetius and Herbart can be ranged on the side of plastic impression.

But indeed there is a *suggestio falsi* in the presentation of the problem as a case of 'either—or'. For, if anything at all has so far emerged from this discussion, it is that liberty and authority are twin poles of one system. Learning certainly is activity, but (to be worth while) must be disciplined activity.

Abdicationist Theory

The extreme ' expressionist ' theory of education—the theory that the teacher's job is to refrain from interfering with a natural process—is now fortunately *vieux jeu.* And one cannot avoid the suspicion that this abdicationist theory of education makes a special appeal to those who have lost their sense of direction in education, and perhaps in life generally. Loss of faith and purpose commonly leads to an introspective preoccupation with the psyche. People of firm conviction and clear purpose are usually content to let the psyche look after itself. The Victorians were right in their implicit assumption that health of mind and spirit lies in getting on with a job and not dwelling fondly on the state of our own souls. Self-expression is sometimes a preoccupation of those who have nothing to express. The age of the patron in art was good because the patron gave the artist a job to do in a certain way and did not allow him to relapse into mere disclosure of his emotional states, which, though doubtless of diagnostic and even therapeutic value, is not necessarily art.

We have something to learn, I think, from the healthy objectivity of that old book on School Method, with its instructions as to how the pupil should sit, its confidently terrifying recipes for the history lessons of Standard IV, and its precise prescription of appropriate treatments for ' Ten Common Faults of Schoolboys '.

Pedagogists of that day were untroubled by the deeper anxieties and uncertainties stirred up by the modern psychology of the emotions. What psychology there was, was almost entirely cognitive. Much that was taught 50 years ago—and not so long ago—may have been unsuitable and indigestible fodder, but one cannot help feeling that the confidence with which the whole thing was done must have had its effect in communicating to the pupils a sense of security which is one of their greatest needs, and which is sometimes lacking with teachers who have been, so to speak, unnerved by psychology. Is it better, perhaps for a teacher to be sure of the wrong thing than not to be sure of anything at all ?[14]

Levity apart, it is the objectivity of the older approach that we can profitably reflect upon. Learning was thought of as mastering certain knowledge and external experience rather than as the unfolding of interior processes. The teacher was not afraid to teach, and not afraid to say: " This is the right way, and this is the wrong way." Even art was thought of, not as the working out of subjective emotional tensions, but as depicting some object—and doing it correctly, according to accepted principles.

There is something very healthy about this objective approach, which set standards and insisted that things should be done properly. But it had an obvious weakness. Little or nothing was done to justify to the child the tasks that he was expected to perform. The content of education was by and large taken for granted, and teachers had somehow to get it into children's heads. The enormous and simple truth was too often overlooked that effort will be greater and more effective if children are convinced that what they are required to do is worth doing. That is surely the heart of the ' doctrine of interest '. ' Interest ' does not mean leaving children to their own devices—that is a sure and certain way of boring them. Interest does not mean making things easy. Interest means evoking enough effort to tackle the difficult jobs with spirit and determination.

We have much to learn from the modern emphasis on activity and child study. It is right, I am sure, that we should start our planning of education from a consideration of the needs of the children rather than from some preconceived curriculum which has somehow to be got into children's heads. It is an eternal truth, of which modern thinkers have no monopoly, that learning is an active and not a passive process, and it is part of the same eternal truth that positive motive is more fruitful than negative motive. By that I mean that children will do more and better work if they see the point of doing it than if they are merely anxious to avoid the consequences of not doing it. It is sound education (and in this our predecessors often failed) to enable the young to see the point of what we expect them to do and (as far as possible) not to expect them to do things they are incapable of seeing any point in doing.

For otherwise it is impossible for the learner to be, so to speak, on the side of learning. If the essence of responsibility is to understand the law, to make the law one's own, and then perhaps to improve the law, there must be in all education two elements—technique and inspiration, form and content, authority and freedom. There is no rule of thumb for the right combination of these two elements—at what stage to teach perspective or the rules of grammar, or the right use of woodwork tools. What we do know is that we can kill enthusiasm by forbidding a boy to make a box or play cricket until he has mastered the use of his tools and his bat; and that a boy will lose interest because he is tired of doing a thing badly, and no one shows him how to do it better.

The right combination of spontaneity and control is not easy. The combination of any two things that are in natural tension is not easy, and it cannot be made easy. There is always a danger of overbalancing on one side or the other. The whole history of education is a commentary on the difficulty of keeping that balance. But there is no escape from the difficulty, for is not the resolution of tensions and the reconciliation of conflict the very essence of progress and of life itself ?

Growth through Freedom

What is true about learning is true about living. Life confronts us with this paradox—that if we make the satisfaction of our own selves our conscious objective, it eludes us. We grow as persons by finding something other than ourselves to live for—by losing ourselves in something sufficiently worthwhile to make us forget to worry about ourselves. Our most important freedom as persons is freedom from inhibiting concern about our own comfort, convenience, safety. Only when freed from slavery to self are our faculties released for fully effective action.

Freedom, that is to say, lies not in self-centred

retreat from obligation, but in self-giving acceptance of the claims of life. Freedom does not mean exemption, but commitment.

Here is the ultimate reconciliation of freedom and authority. For the law in which our liberty is fulfilled is not a law of our own making, but one that we recognize as made for us, and accept as right for us. I commend to you some words of the late Sir Stafford Cripps, as profound as they are unpretentious: " Freedom is doing the right thing of our own accord."

Nor must we forget that a true synthesis of freedom and authority carries the implication that our ultimate reference is to values beyond the mundane order. There can be no responsibility—only servility on one side and tyranny on the other—when the final moral authority lies with the state. If the citizen and the state are to be rationally responsible to one another, it can only be because both are answerable to a higher power.

In the years to come we shall need as never before people who are responsible in the sense that they think independently and act socially.

There is a more important issue in the modern world than the fate of our civilization. It is, as Nicolai Berdyaev has insisted, the fate of the human spirit. What is at stake is the integrity of man himself. That, incidentally, is the prophetic message of the Existentialists.

The integrity of man depends on the courage with which he can accept his ultimate responsibility as a person, face to face with the hazards of the world and the challenge of his destiny, with its mysteries of sin and death, freedom and love, and the endless necessity for the attainment of the unattainable.

The purpose of education must be to exalt the image of the free, responsible person, and to fortify each individual in the struggle to redeem and establish the true dignity of man. In a world where mass feeling invites the absorption of personal identity, and technical organization invites the abdication of humanity, nothing can be tolerated in education which offers escape from what the Grand Inquisitor in Dostoievsky's legend called " the terrible gift of freedom ". If man is not to unman himself, he can play for no lower stakes, however the dice may be loaded. Whether it is our fate to seek for ever what we can never find, or whether there is a destiny for the human spirit beyond tragedy; whether we can discover nothing beneath our feet but the bottomless pit, or whether we believe the abyss, accepted, is none other than the lap of God; that is a question which may find no clear answer within the compass of this world. But, if it is worth striving for the impossible—if that is a sane and not a lunatic attitude—is it not because, on some plane of transmutation, the impossible is already accomplished ?

NOTES

[1] *School Method*, by F. J. Gladman, sometime normal master at Borough Road Training College. No date of publication given.

[2] *Story of a School*. Ministry of Education Pamphlet No. 14, 1949, page 9.

[3] Even between the wars, schools changed a good deal. A woman teacher who, on marriage, left teaching for 15 years (about 1930-45) described the change that she observed by saying that, when she left the profession, the children were ' desk-bound ', but when she returned they ' came out to meet her '. " What I didn't know about modern methods the children taught me in a week."

[4] *Citizenship*, p. 68.

[5] The most important and distinctive fact about the modern world is the failure of the church to maintain the authority of religious values in political and social life. It has often been said that the trouble with Christendom is that it has never been Christian. The Christian doctrine of the infinite value of the individual human being provides a complete theoretical foundation for democracy, social reform, and universal education. Had the modern industrial system grown up in a truly Christian country, no doubt greed would have been restrained, poverty relieved, and ignorance dispelled. But the influence of the Christian doctrine of man on historical development has always been impeded, partly by the resistance of a secular order based on inequality, and partly by a fatal tendency of ecclesiastical bodies to fall into one or other, or both, of two errors. One of these errors is to present the Kingdom of God as something purely transcendental, unconcerned with social justice (' pie in the sky '). The other is to allow an organized church to become so identified with an established social order that it becomes impotent as an agent of social change. This happens most obviously when a church depends on the financial support of a privileged class. It would be a great mistake to belittle the work of the Church of England in the 19th century for social reform and especially for education, or to doubt the sincerity of its philanthropic work. It is nevertheless true that the church's vision was socially limited, and that much of its philanthropic work had a flavour of *de haut en bas*. Perhaps the most glaring example of ecclesiastical paralysis due to entanglement with social privilege is that of the church in France at the time of the Revolution. The church being hopelessly compromised, it fell to secular—and even anti-religious—agencies to proclaim the fundamental human rights.

[6] Condorcet believed in " the infinite perfectibility of man " by the power of reason. Rousseau was the prophet of romantic naturalism.

[7] I do not want to suggest that, with the rise of naturalism, there was a sudden rejection of religious belief. History is more confused and complicated than that, and not the least ironical of its complications is the spectacle of secular agencies doing the church's work for her and even against her. In the 17th and 18th centuries, thinkers found little difficulty in reconciling religious and naturalistic ideas. Descartes, although largely responsible for the modern philosophical débâcle, never doubted the existence of God; nor did Spinoza or Locke. Even today, when agnosticism and atheism go undisguised, it is still easy to warm up naturalism with a glow of piety by remembering that man is made in the image of God, but forgetting the Fall. The cross-breeding of naturalism and religion has produced a good many metaphysical mules, that are not without the recognized limitations of their kind.

[8] The words of Ezekiel, echoed by Jeremiah: " The soul that sinneth, *it* shall die. The son shall not bear the iniquity of the father ", were a revolutionary pronouncement in their day. *Ezek.*, XVIII, 20; *Jer.*, XXXI, 29, 30. The Deuteronomic Code of the Seventh Century, evolved under the influence of the Exile and of the eighth century prophets, limits responsibility to the actual transgressor. Among the Greeks, the Sophists led the critical movement that affirmed the right and duty of the individual to judge for himself of truth and goodness. Athenian individualism was at once the greatest achievement of Greek democracy and the greatest danger to the stability of the Greek State. The Sophists sought to substitute a critically rational morality for a customary one. On the virtue of self-reliance, cf. the words of Pericles: " I doubt if the world can produce a man who, where he has only himself to depend upon, is equal to so many emergencies and graced by so happy a versatility as the Athenian."

[9] Thomism had not emphasized the individual, regarding him as the channel through which the Universal expresses itself. Luther's ' Every man a priest ' has far-reaching political and educational implications. At the same time it would be a mistake to think of Protestantism as a simply individualistic movement. Protestantism had its own forms of authoritarianism. Luther set up an authoritarian Bible in place of an authoritarian church, and Calvin's doctrine of the utter corruption of human nature was not conducive to optimism.

[10] Herbert Spencer applied Adam Smith's principles in the field of education in such a way as to arrive at the (to us) extraordinary opinion that to withhold education is no enfringement of liberty, since nothing is thereby taken away that was previously possessed.

[11] For example, some of the extreme experiments under the Weimar Republic.

[12] It is interesting to observe the fascination which this doctrine exerts, for opposite reasons, upon the mind of the U.S.S.R. and the mind of the U.S.A.

[13] For Plato learning was the rediscovery of things known in previous existence, and for Aristotle activity was the essential principle of the soul. Aquinas followed Aristotle and compared the teacher to the doctor who cannot heal without the co-operation of Nature and the patient.

[14] The spectacle of easy-going modern parents with badly behaved children suggests that much of the children's bad behaviour is a legitimate protest against the parents' failure to keep them in order—that is, to supply a necessary framework for living. The child virtually says: " Look at me. I'm all over the place. Do something about it ! "

Book Reviews

Aids to Orthopaedic Surgery and Fractures

(*fourth edition*)—by William Waugh, M.A., M.CHIR. (Cantab.), F.R.C.S. (*Baillière, Tindall and Cox, 7 and 8, Henrietta Street, London, W.C.2, 12s. 6d.*)

This new edition of *Aids to Orthopaedic Surgery and Fractures* has been completely revised and largely re-written in an attempt to bring the subject matter up to date and in line with present developments.

It is an outline of orthopaedic surgery, fractures and soft tissue injuries, in a simple and convenient form. It is a small compact book which can be slipped into a pocket. However, it has not been primarily written for nurses and does not give any hints on nursing problems; there are no diagrams. A qualified nurse undertaking this type of work will find the book a valuable ally if she has a sound knowledge of anatomy.

B. A. M. F., S.R.N.

A Short History of Public Health

—by C. Fraser Brockington, M.A., M.D., D.P.H., M.SC. (*J. and A. Churchill, Limited, 104, Gloucester Place, London, W.1, 15s.*)

Professor Fraser Brockington's short history of public health will be welcomed by students seeking a concise description of the growth and development of the various services in this country. Since the book is evidently designed to meet just this need it may seem unjust to regret its neglect of a rather broader approach to the subject. Although reference is made to contemporary events at the various stages, it may well be felt that more space might have been devoted not only to the changing climax of public opinion, which is touched upon briefly, but also to the changing role of the family and particularly the changing status of women, all of which have led to new concepts in public health work.

Apart from this criticism which in any case is concerned with an aspect which the author has not set out to cover in this brief volume, the book should fill a need for students of public health, and the comprehensive bibliography should suggest further reading on the subject.

E. E. W., S.R.N., H.V.TUTOR CERT.

Physiology and Anatomy

with Practical Considerations (*seventh edition*).—by Esther M. Greisheimer, M.A., PH.D., M.D., with the assistance of Ann A. Miraldo, R.N., B.S. (*J. B. Lippincott Company, published in Great Britain by Pitman Medical Publishing Company Limited, 45, New Oxford Street, W.C.1, 35s.*)

The seventh edition of Miss Greisheimer's book is the result of drastic revision of this sound, well-illustrated and generous text. The chief alterations resulting from this revision are to be found in the chapters on endocrinology and the central nervous system, but elsewhere a general rewriting has greatly improved the presentation of both divisions of the book, which for its size contains a remarkable amount of information, whose accessibility and readability are much the better for their recent streamlining. The illustrations, mainly line drawings, convey their messages clearly and simply, and while omitting nothing, have no superfluous detail. Each chapter ends with a useful summary of its contents and a set of questions, to each of which the reader is expected to select the proper reply from a set of four given answers. This method of teaching, popular in the United States, does not find much support over here.

The author's generosity towards her readers has led her to include descriptions of the practical application of each subject: she extends the matter of each beyond the classroom into the everyday world of health and disease. There is no doubting the value of giving some such illustration of the practical value of anatomy and physiology when applied to medicine, but it is by no means easy to know where to stop and draw a line. It seems unfortunate that through this inability to know where to draw the line the book should have to finish up with a solemn warning of the dangers to sexual hygiene of the custom of 'petting'. This is alien ground for such things, however well written, and however cogent the need may seem to the author. If later editions call for a slimming process, it is upon these 'Practical Considerations' that the axe should fall.

There is a comprehensive bibliography, comprising almost wholly American books. Is it too much to suggest that, having a British publisher, this might have been amended for British readers, for whom the majority of the books listed are inaccessible? There is also a useful glossary, but readers must take care to avoid irritating their examiners by adopting American spelling.

J. G. B., M.B., CH.B.

The Mathematics of Dosages and Solutions

—by I. L. Ferguson, M.S.P.H., PH.D., and E. S. Ferguson, B.A. (*W. B. Saunders Co. Limited, 7, Grape Street, London, W.C.2, 23s.*)

Many hours of careful thought have been given to the preparation of this book by its joint authors, but like so many American textbooks, the difference in spelling and in customs make it impossible to recommend to students of nursing in this country.

K. M. C., S.R.N., S.C.M., S.T.D.(LOND.)

Determined to Live

—by Brian Hession. (*Peter Davies Limited, 38, Bedford Square, London, W.C.1, 15s.*)

Brian Hession is a minister of the Church of England and for 13 years was vicar of Holy Trinity, Aylesbury. He was the dominant figure behind the idea of religious films for teaching Christianity and founded a trust for making filmstrips for the use of Christian leaders.

While in America acting as spiritual adviser to a Hollywood company engaged upon making a religious film, he collapsed with what was diagnosed as carcinoma of the rectum and large intestine. The growth was so extensive that the specialist diagnosing his condition refused to operate and gave him three or four days to live.

It seems incredible to read that, before leaving England, Mr. Hession had had a medical examination and had been told by his medical adviser that his condition was due to haemorrhoids. The author tells of the frantic, desperate period during which he and his wife tried to find a surgeon who would be willing to operate and how finally he succeeded.

The book is an autobiography of this period in the author's life and his ultimate recovery. It is intended to convey hope and courage to those who are ill with cancer. He has revealed his inmost thoughts and emotions during his fight back to health, in the sincere hope that they may bring help and encouragement to others who suffer. He has shown his tremendous faith in God and the power of prayer. He emphasizes the effectiveness of collective and individual prayer and urges his readers, particularly those who are suffering, to have daily communion with

God and to have implicit faith in God, whatever His will may be.

Nurses who are concerned with the whole man—mind, body and spirit—will be particularly interested in this book. It will enrich their awareness of the important part played by mind and spirit in combating physical illness, and it will help them in their daily contact with patients to encourage and uplift the mind and spirit through prayer and communion with God, as part of the progress towards restored health.

Comments on the First Report of the Expert Committee on Psychiatric Nursing, WHO

by ANNIE ALTSCHUL, B.A., S.R.N., R.M.N., SISTER TUTOR DIPLOMA.

THE Expert Committee on Psychiatric Nursing held its first session in Geneva from August 28, 1955, to September 3, 1955. Its report* is now available. It is a most interesting document, which deserves careful study and should provide the basis for discussion among all who work in the psychiatric field. The sections of the report dealing with the education of psychiatric nursing personnel in particular should have far-reaching effects on the shaping of any future training syllabus, and on developments in nurse teaching.

The formation of a joint committee consisting of nurses and psychiatrists was suggested by the Expert Committee on Mental Health in its third report, *The Community Mental Hospital.* From this report it is evident that joint discussion between these two groups of professional workers can be fruitful, not only in Geneva, but in any country which desires to clarify the proper roles of the various psychiatric personnel, and which is anxious to improve its psychiatric service to the community.

Throughout the report there are many references to recent changes described in *The Community Mental Hospital,* which make it desirable for the reader to refresh his memory on the previous document.

Miss O. Griffith, mental nursing officer, Ministry of Health, London, was chairman of the committee, and the late M. G. Kraus, professor of psychiatry, Neuropsychiatric Clinic, University of Groningen, Netherlands, was vice-chairman.

The committee reported its findings under five headings: (1) introduction; (2) the role of the psychiatric nurse; (3) education of psychiatric nursing personnel; (4) further studies in psychiatric nursing; (5) conclusions and recommendations.

In the introductory chapter, the development of psychiatric thought is explained. It is emphasized that in every country psychiatric nursing practice is directly related to cultural attitudes to the mentally ill, and to the development of psychiatry and of nursing as a profession. Problems exist in all countries which differ according to the stage reached in the understanding of mental disorder. The committee agrees that much could be gained by exchange of ideas and experiences but warns against the indiscriminate application of any particular pattern of development to other countries. Care for the mentally ill has been established for many years in some countries while in others it is only just beginning. Newly developing countries would not necessarily benefit from copying the practices of more advanced countries, as some of the difficulties of the latter may have arisen as a result of some of their earlier mistakes.

Certain similar trends in psychiatric practice can be identified in the various countries. Increasing recognition of mental deviation as an illness has led to the establishment of facilities for the care of psychiatric patients, and the need for people to look after them.

The type of care given cannot in any case be ahead of the level of development of psychiatry in the country. The committee believes that it unfortunately often lags behind.

The section 'The Role of the Psychiatric Nurse' develops further the theme of the introductory chapter. The factors which determine the role of the nurse are again shown to be related to the general level of psychiatric care and to the social and cultural influences of the community.

At the more advanced levels the nurse provides much more than custodial care. She no longer limits her interest to the provision of the basic commodities of life for the patient. Restraint, protection of the community or of the patient, are not emphasized. Instead, the nurse tries to understand and accept the patient and to modify her attitude to him according to his need.

As the nurse's role shifts from a custodial to a therapeutic one she becomes aware of the significance of interpersonal relationships. The patient is seen within the hospital community, the effect of the group on the patient and of the patient on the group is studied and taken into account. The nurse becomes aware of her own personal influence on each patient and on each group of which she is a member. Prevention of mental illness and rehabilitation of the patient for life in the community become part of the nurse's concern.

Three overlapping aspects of psychiatric nursing are distinguished:

(*a*) *the technical*—concerned with routines providing acceptable standards of living for the patient and with nursing techniques connected with the patients' physical welfare;

(*b*) *the social*—which includes the planning of a variety of activities for patients and the recognition of the value to the patient of participation in social activities such as work and recreational activities;

(*c*) *the interpersonal*—which is considered the most important aspect of her task. The nurse can develop interpersonal skills while carrying out technical and

* *World Health Organization Report Series No. 105. First Report. (H.M. Stationery Office, 1s. 9d.)*

routine activities, and can utilize interpersonal relations as they occur during all phases of the patient's life in the hospital.

The emphasis throughout this section is on the importance of group activity. Patients at all times are part of a group, be it the small group engaged in a specific task, the informal group around the fireplace, in the ward, the larger ward group or hospital community. The nurse is constantly influencing such groups and being influenced by them. The committee suggests that the nurse should learn to become aware of the skills involved in these activities.

Group discussions among patients and among staff have become an integral part of ward management, and the nurse should be able to conduct small face-to-face groups, and to analyse the interaction of personalities in the groups of which she is a member.

The role of the supervisory nurse and of the nurse working outside the mental hospital is examined and it is stated that the nurse can fulfil an important function in community care before and after hospitalization and in public health nursing. This part of the report appears a little sweeping and superficial and there is no detailed analysis of the specific role of the psychiatric nurse in these fields of work.

The chapter on The Education of Psychiatric Nursing Personnel consists of two very important sections. The first part deals in general with the education of the nurse. Traditional methods of teaching, in particular straight lecturing, are strongly condemned because they cannot effect genuine change in the nurses' behaviour and personality, and cannot be related to the nurses' educational needs of the moment. They do not provide the necessary experience in human relations. This part of the report should be studied by every tutor, not only in psychiatric hospitals, as it appears to be one of the soundest and most concise accounts of educational theory applied to nursing written so far. It deals with motivation for learning, with effective learning as a form of problem solving, with various obstacles to learning and with methods of teaching adapted to the needs of the student.

Group methods of teaching and learning receive particularly detailed attention, because in addition to their other advantages they may serve to give nurses an understanding of group processes required in the work with patients.

The second part deals with the subject-matter needed by the psychiatric nurse and with principles of curriculum construction.

The committee felt it important that a minimal basic curriculum should include three broad fields of study:

(1) principles of human behaviour and development;
(2) concepts of mental illness;
(3) principles and practice of psychiatric nursing.

Those who are concerned with nurses' education in this country will wish to read this section in full and compare it with the existing and proposed syllabus of the General Nursing Council. This section will receive widely differing treatment and interpretation according to the stage which psychiatric development has reached. As pointed out in an earlier chapter, psychiatric nursing can never be ahead of the level of psychiatric practice. There is no guidance in the report on how the suggested minimal curriculum can be adapted to the less advanced stages of development.

The next section of the report suggests possible subjects for research in psychiatric nursing, and the report closes with a list of conclusions and recommendations, summarizing the findings of the committee and emphasizing that the report represents only a beginning of a basis for identification and solution of the problems in this field.

Association of Hospital Management Committees

METROPOLITAN REGIONAL BRANCHES CONFERENCE

THE hospital bed was the most expensive item in the National Health Service, said Mrs. Ena Daniels, chairman of the North West Metropolitan Regional Branch and chairman of the conference held by the Metropolitan Regional Branches of the Association of Hospital Management Committees at County Hall, Westminster, on October 30. Hospitals were embarrassed by the number of patients admitted every day. She suggested that many might well be treated by their own doctor or the medical officer of health and nursed in their own homes. This is already being tried by one London hospital which is sending nurses to nurse children at home.

Dr. H. D. Chalke, medical officer of health, Camberwell, deplored the lack of exchange of information and the retention of insular attitudes which prevented real co-operation between hospitals, general practitioners and public health authorities. "The situation is getting better now", he said; "people are attempting to work together because they *have* to. Health visitors are helping to combine the three branches by their work. When a general practitioner sees what a health visitor can do, he finds he cannot do without her. Requests from hospitals are now coming in for health visitors to see patients who might otherwise have to spend long hours in outpatient departments."

Co-operation between individuals in different areas was the most effective way of combining the three branches, Mr. Kenneth Robinson, M.P., thought. One of the obstacles of the health service was that the service varied so much in different districts and different departments. He said we should watch that the health visitor did not become an all-purpose social worker. She had a definite job which was different from that of the psychiatric social worker.

Dr. A. L. B. Torrie, until recently physician superintendent, The Retreat, York, said that the mental health service could not change until enough people cared about the problem. Over 40 per cent. of the hospital beds in this country are for mentally ill patients, but 40 per cent. of hospital management committees' time was not concerned with mental health, neither was one third of the health service money spent on mental health. He knew of one hospital group where the mental hospital always came at the bottom of the committee agenda. He urged more interest among the public, more fact-finding surveys, more health centres, more research funds to study different psychiatric points of view.

Miss Davies, liaison health visitor, Cardiff, said that mental health needed the same enthusiasm and concern which had been given to the prevention of typhoid, poliomyelitis and smallpox in this country. Hospital management committees should encourage the interchange of general and mental trained nurses and so help to remove the tension between them, born out of fear and ignorance.

A filmstrip produced by
CAMERA TALKS

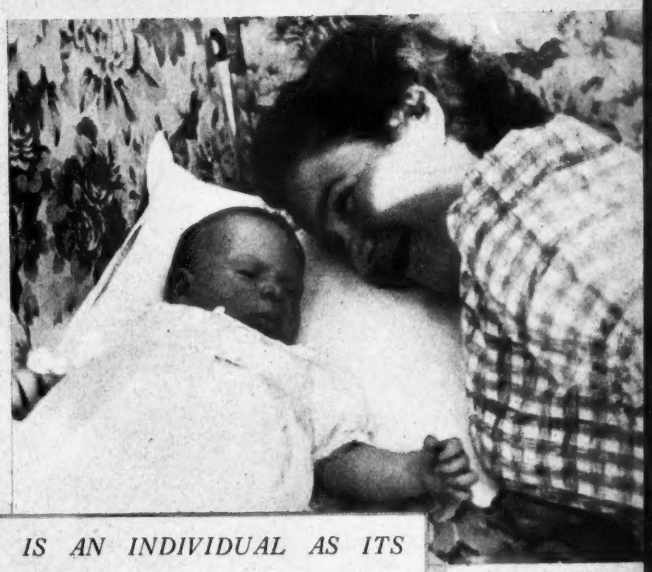
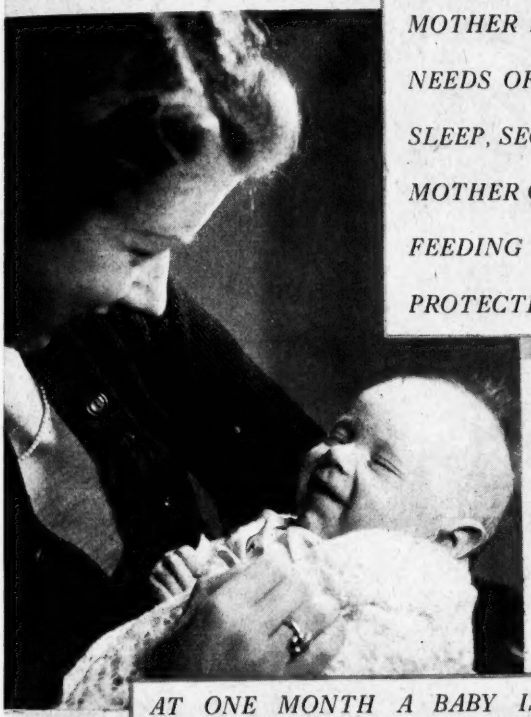
BIRMINGHAM CITY PUBLIC
HEALTH DEPARTMENT

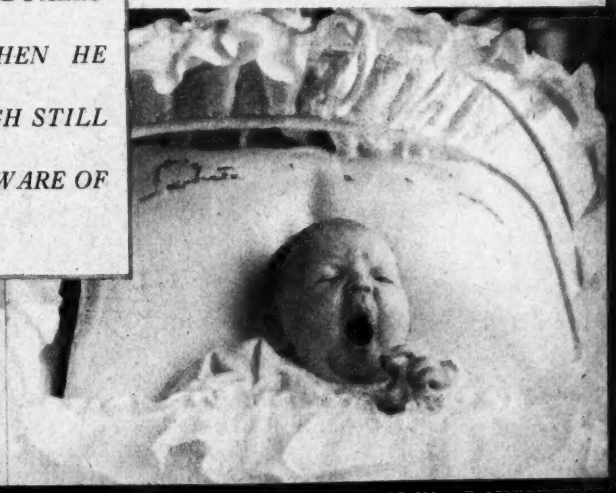


EVERY BABY IS AN INDIVIDUAL AS ITS MOTHER IS AN INDIVIDUAL. THE PRIMARY NEEDS OF THE CHILD ARE FOOD, WARMTH, SLEEP, SECURITY AND AFFECTION GIVEN BY MOTHER OR MOTHER SUBSTITUTE. BREAST FEEDING IS NATURE'S PERFECT FOOD AND PROTECTION AGAINST INFECTION.



CHILD DEVELOPMENT

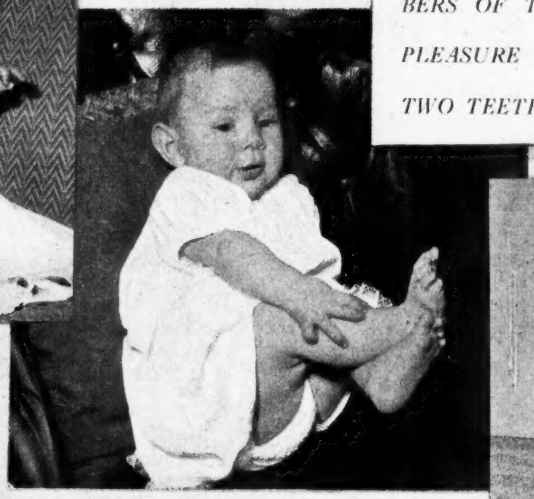
AT ONE MONTH A BABY IS GRADUALLY EMERGING FROM THE STAGE WHEN HE SLEEPS NIGHT AND DAY. ALTHOUGH STILL HELPLESS HE IS BECOMING MORE AWARE OF HIS SURROUNDINGS.



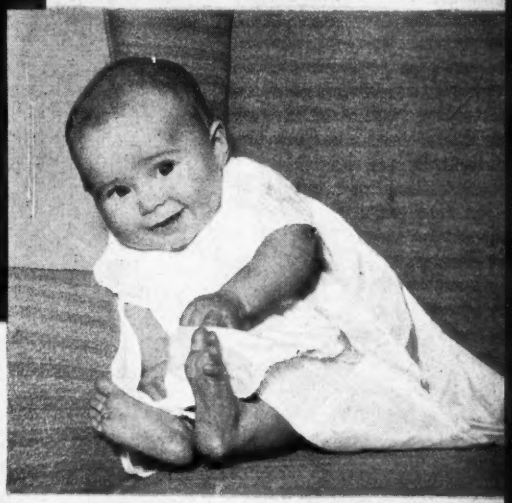
AT THREE MONTHS BABY HAS GAINED CONTROL OF THE TINY MUSCLES WHICH MOVE HIS EYES. HE WILL RESPOND TO MOTHER'S SMILE, PLAYS HAPPILY WITH HIS OWN FINGERS.

BABY AT EIGHT TO NINE MONTHS CAN SIT ALONE FOR SHORT PERIODS AND ENJOYS A VARIETY OF SOLID FOODS. IS BECOMING MORE INTERESTED IN PEOPLE OUTSIDE HIS FAMILY GROUP.

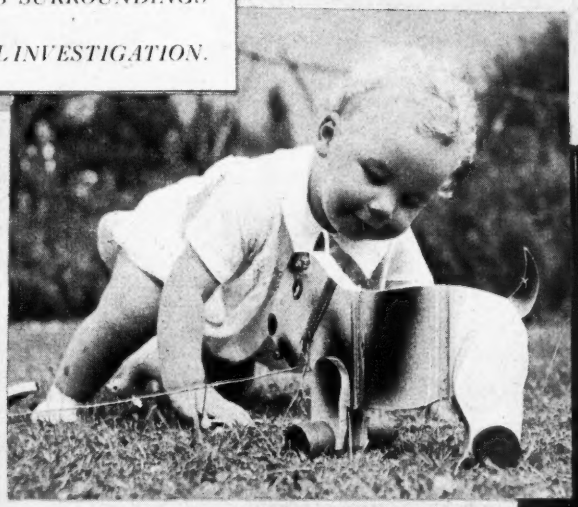
AT ONE YEAR THE CHILD HAS TREBLED HIS BIRTH WEIGHT. AVERAGE HEIGHT 29 INCHES. MAY HAVE UP TO 10 TEETH. CAN SAY A FEW WORDS. STANDS ALONE AND MAY WALK WITH HELP. HE HAS A GREATER UNDERSTANDING OF WHAT IS HAPPENING AROUND HIM. HE IMITATES BUT RETAINS HIS OWN INDIVIDUALITY.



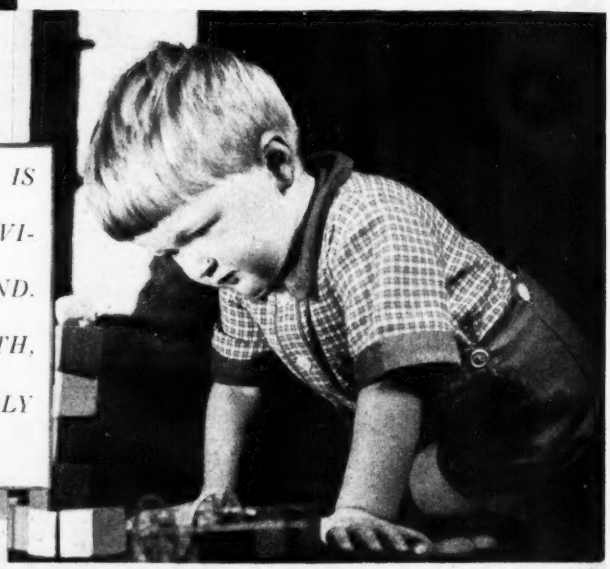
AT SIX MONTHS BABY HAS DOUBLED BIRTH WEIGHT, CAN SIT IF WELL SUPPORTED AND GRASP OBJECTS. RECOGNISES OTHER MEMBERS OF THE FAMILY, SENSES MOTHER'S PLEASURE AND DISPLEASURE. MAY HAVE TWO TEETH.



BETWEEN NINE AND TWELVE MONTHS BABY PREPARES TO WALK. BECOMES INCREASINGLY INTERESTED IN HIS SURROUNDINGS WHICH LEADS TO PERSONAL INVESTIGATION.



AT EIGHTEEN MONTHS THE TODDLER CAN WALK EASILY, AND RESPONDS TO SIMPLE COMMANDS. LIKES TO DO LITTLE ERRANDS OF FETCH AND CARRY.



AT TWO YEARS OF AGE THE CHILD IS DEVELOPING HIS OWN DEFINITE INDIVIDUALITY AND LEAVING BABYHOOD BEHIND. HAS USUALLY CUT ALL HIS BABY TEETH, SAYS SHORT SENTENCES, AND IS RAPIDLY ACQUIRING PRECISION OF MOVEMENT.

A HAPPY FAMILY LIFE ENABLES A CHILD TO TAKE HIS RIGHTFUL PLACE IN THE FAMILY CIRCLE AND IN THE COMMUNITY AS A WHOLE.

WARD AND DEPARTMENTAL SISTERS SECTION CONFERENCE

THE PATIENT AND THE STUDENT NURSE

The Place of the Ward Sister in the Educational Team

PROBLEMS discussed by the speakers and the practical and searching questions arising from group discussions at the conference organized by the Ward and Departmental Sisters Section, Royal College of Nursing, showed that members were alive to the difficulties of present-day ward management and student nurse training and were tackling them realistically. On the first day **Miss R. Chambers,** extra-mural lecturer, London University, speaking on The Community, had pointed out that there will be an increasing number of women of about 40 years of age seeking employment. The trained nurses among them could, with refresher courses, help to relieve staff shortages. **Miss L. E. Charlesworth,** headmistress of Sutton Girls High School, Surrey, outlined the changes which had taken place in the upbringing of girls. They now had freedom to make their own decisions at an earlier age and could choose from a wide variety of well-paid jobs. Nursing in the present total community setting had many drawbacks. Compared with other work, there were fewer evenings off, pay was still too low, there were still too many domestic duties and night duty added strain.

The kind of girl needed was one who was interested in people—sympathetically yet not emotionally—who had her feet on the ground, a sense of humour, adaptability and an ability to accept criticism and discipline even if at the time it seemed unjust. Miss Charlesworth thought we should encourage the idea of vocation but should not trade on it. Training should develop what was already present in the student. Had we, she asked, in our desire to understand adolescents, become too 'chummy', fearing to deny or criticize? This attitude made them feel insecure by seeing adults evading the issue.

Ward Problems

On the second day, **Miss C. M. Harris,** a ward sister of 18 years' experience, now working in one of the oldest hospitals in Wales, Swansea Hospital, showed how an old ward can be adapted administratively and structurally to meet new needs. She is in charge of a ward of 34 beds for women and a small ward of eight beds for men, all medical cases. At first she had eight nurses and one ward maid. Now she has fewer nurses (the number varying according to the total supply and the demands of other wards), four ward maids and a receptionist.

The ward maids are responsible for all the cleaning, laundry-checking and kitchen inventory. One prepares patients' teas and suppers, another prepares special diets. Interest in their jobs and a feeling of responsibility produces good work and they are proud of their place in the ward team.

The receptionist answers the telephone, looks after relatives who accompany patients to the ward on admission until the sister or staff nurse can see them, arranges flowers, packs drums, and is generally on hand to deal with queries and take messages. She works in the ward from nine till five.

Porters lift heavy patients and fix up heavy equipment in the ward.

Student nurses therefore have more time with patients and more time for instruction from the ward sister.

Miss Harris said that changes in treatment and administration over the last few years had created new problems. There was the danger that in relieving nurses of non-nursing tasks, they might feel that knowing how to clean a ward was not a nurse's responsibility. Patients left hospital earlier and nurses could not get to know them so well, yet short-term patients had just as many worries and fears as long-term patients. Nurses must be kept informed of all that went on so that they could answer questions intelligently.

The assistant nurse's point of view was put by **Miss A. J. Hill,** who has had 22 years' experience and works at St. Matthew's Hospital, London. "Every branch of nursing grows from bedside nursing", she

Above: *group leaders confer with the chairman, Miss E. M. Wearn, centre.*

Left: *a lighter moment at the conference at the Royal College of Nursing.*

said. Assistant nurses got their satisfactions from nursing the sick, they had no higher ambitions and were not aiming for higher posts. There were now over 46,000 assistant nurses in this country, which indicated that they must have a place in the ward team.

The patient was not interested in grades, Miss Hill thought; he does not mind who looks after him as long as he has adequate care. Geriatrics and rehabilitation are new words for old jobs. Miss Hill said she had seen work carried out in the old Poor Law Workhouses just as good as that done today. She recalled the squalor and degradation of the poorer patients and said we did not see the results of such extreme poverty today.

She made a plea for recognition of assistant nurse status and said there are still hospitals where auxiliary nurses are placed on equal status with trained assistant nurses, some are even in sole charge of wards on night duty.

Assistant nurses working in the same hospital for years absorb the local colour and way of life of the patients, and can be very valuable in understanding their problems.

Group Assignment

The group assignment experiment at the Central Middlesex Hospital was reviewed by **Miss N. Deacon,** sister of the ward where this is carried out, and **Miss D. R.Waller,** matron. Miss Deacon said she had got the idea from last year's conference, and after observing the method for two days in another hospital, she began the experiment for a month in her own ward, in consultation with Miss Waller and the medical staff.

She arranged for two groups of nurses, four in each group, to nurse 25 women surgical patients. The next week this was changed to two groups of three nurses each with two nurses relieving off-duty and sickness absences. The total nursing staff was nine; two staff nurses, one nurse soon to be taking her final examinations, two second-year student nurses, two first-year students and two recently out of the preliminary training school.

The group assignment method was modified: in the first hour of the morning and after 6.30 a.m. all the staff share all the work. This prevents undue rivalry and overkeenness and keeps the staff united. The only disadvantage in group assignment is that it needs more nurses, but Miss Deacon believes that more patients could be nursed in this way if assistant nurses were included in the team.

Comments from nurses afterwards emphasized the greater variety in the work, that routine treatments were carried out in half the time, that nurse-patient relationships were better established and patients got more attention, and Miss Deacon had at least an hour a day for teaching. Staff were not specially selected. During the four weeks the two staff nurses had both developed greater confidence. One was in charge of each group and arranged the programme of work.

For the ward sister, Miss Deacon said, it was a 'month of peace' with a much less harassed ward.

Miss Waller supported Miss Deacon's talk and said that with the right personnel this method could work on any ward. Nursing staff decided they would work split duties rather than the shift system. Staff nurses became more experienced in taking responsibility and a higher standard of nursing became possible. The difficulties were mainly administrative. She would like to see group assignment the recognized method all over the country as she believed it would help prevent wastage of student nurses, which at present is partly due to dissatisfactions in the first year of training.

Questions and opinions arising from group discussions were answered and commented on by the speakers. Miss Hill was asked what she considered the status of an assistant nurse should be. She thought they should be equal to third-year student nurses, bearing in mind that though the student nurse knows the theory of nursing, the assistant nurse, with her years of bedside experience, knows the practice. Miss Harris answered a question on the qualifications she thought were needed in a ward receptionist. She said that at this point one could not lay down rules about qualifications; her ward receptionist had had nursing experience, she had made her own place in the team and her work had grown from day to day.

A plea was put forward for fairer distribution of staff in those hospital groups which contain teaching hospitals with no recruitment problem and non-teaching hospitals where staff shortage was acute. It was explained by Miss Wearn, chairman, that at the 'appointed day' establishments then in existence were taken as the establishments required. She said questions of this kind could not be answered by the present speakers but could well be put forward to the Central Sectional Committee, from which a memorandum could be sent to the College Council who could forward it to the appropriate body—the Ministry of Health or the General Nursing Council, for example. The College, she said, was always on the look-out for information of real needs in hospitals and would welcome facts concerning the need for increasing establishments.

Miss Waller was asked her opinion of pre-nursing schools. She said that those run by education authorities for secondary modern pupils at a technical college were a valuable contribution. She was dubious about the value of others less well organized and supervised.

The Training Years

The third day's subject was the training years. **Miss W. E. Prentice,** principal tutor, Stracathro Hospital, said one was inclined to look back on one's training days as the good old days. In forgetting the bad times and remembering only the good it was difficult to look back objectively and critically and try to better the training for present-day students. She outlined the expectations of student nurses. They need a stable background, they must not be made to feel guilty about leaving a busy ward to attend a lecture. Block training systems and study days had helped to dispel this feeling. To the young student nurse, senior nurses of any age are 'ancient', and she expects them to be serene and to have wide experience and be able to answer any questions. Miss Prentice asked, do we mould our students or do we develop them? A young student nurse is often lonely, a little frightened, high-spirited, and anxious to learn. She referred to the article on 'Empathy' (*Nursing Times*, October 12, 1956) and said that if a student's emotional needs are not understood, her feelings become blocked, resentment sets in and will burst out later.

She had heard it said that conversation in a staff nurses' sitting-room was on a level with that of a sixth form common-room. If that was true then we were not helping students to develop as they should. All students take on something of the demeanour of their teachers. Obedience born of mutual respect is better than the 'theirs not to reason why' type.

Formal teaching on the ward is often not possible and indeed is not always necessary. Students learn by example, by watching the ward sister demonstrate her ordinary everyday skill and absorbing knowledge unconsciously. It is difficult for a ward sister to be always on show but she can find greater satisfaction in her work if she combines it with this kind of teaching.

Although a nurse's first duty is to her patients, this does not mean that teaching the student comes second.

for teaching ensures the best service for patients.

Miss M. B. Whittow, ward sister at University College Hospital, said we must work with what we have rather than wait for what we think we need. She deplored the fact that nurses are often expected to take full responsibility for a ward almost overnight after qualification, and thought that third-year students should be given experience in ward management, sometimes left in charge of the ward with a trained nurse within call. One cannot divide theory and practice, one must teach as one works. Learning from experience is all very well but it must not be from bitter experience. The idea that students are wasting time if found talking to the patients dies hard.

Miss Whittow remarked on the difficulty that many ward sisters and sister tutors had in ' dropping in ' on each other to talk over current training problems informally. Sometimes this was due to the distance between ward and classroom and sometimes to administration.

Movement of staff is often too rapid and too sudden. Staff nurses, she thought, should stay on the ward for at least a year and the ward sister should have a say in their appointment. She asked if we were justified in changing a student nurse's off duty at a moment's notice, as sometimes happens when duty lists are changed suddenly.

Miss I. Spalding, Secretary of the Student Nurses' Association, said that as a ' paid employee ' of student nurses, she was treated with a refreshing ease of manner. Listening to their problems she had discovered that they wanted student status, but were not always very clear about what the words meant. They certainly did not want to become academic, but they did want to be treated as individuals. Their attitude to assistant nurses was mainly one of gratitude for undertaking much of the routine work and giving students more time for learning.

The three speakers were asked their opinions on such questions as student nurses' lack of bedside routine practice, nurses homes or hostels, block training or study days, unfavourable publicity about hospitals, language problems of foreign nurses, examinations and current ward practice. Miss Whittow said one could only learn technique by constant practice and in our desire to give students as much variety as possible, we should not overlook this fact. Miss Prentice said that it did not matter whether the person in charge of a nurses home was a nurse or not, provided she was the *right* person, a warm, homely woman. Miss Prentice also had much to say on training methods. She has decided that the block system is the best we have yet thought of but it is not perfect. She finds that students coming to her for study days spend the first hour and the last with their minds on the ward. The block system is now established in Scottish schools of nursing. She also thought that a day's discussion between doctors, sister tutors and ward sisters would be very valuable.

Miss Spalding said she knew that many foreign nurses in this country were unhappy. Some, especially those from Europe, had terrible histories. Difficulties were not only about language. Although matrons had gone out of their way to try to integrate foreign students into the life of the hospitals, they often had to be dismissed eventually, causing distress to students, matrons and all members of the staff. Miss Prentice said that all was not well with the selection of British students, some had great difficulty in writing concise notes in good English; we should stop wasting our time with people who could not be trained and should press for the general certificate of education as a compulsory requirement for all student nurses.

There was a general agreement that examinations should be brought into line with current practice and that some examiners were out of touch with modern thought.

At the end of the conference, Miss Wearn, chairman, said members had covered a wide variety of problems, from that of schoolgirls growing up in a changing social pattern, to making the best of old hospitals, revising nursing establishments and training programmes. She said the success of a conference did not depend on the amount of knowledge assimilated but on the willingness to put into practice the decisions arrived at. The place of the ward sister as a member of the educational team was assured and she was looked upon as the one to keep the standard of nursing high.

STUDENT NURSES SPEECHMAKING CONTEST

(continued from page 1191)

Miss Lucas, chairman of the Association, extreme left, with the competitors; Miss Erith Davies of Swansea General Hospital, the winner, standing centre.

summer. It was appropriate that the guest chairman should be Mr. Jorgen Benzon, Assistant Press and Cultural Attaché to the Danish Embassy in London. At the beginning of the proceedings, which he conducted in a delightfully friendly and informal manner, Mr. Benzon lit a candle in a tall Danish candlestick—a typical feature of Danish welcome and hospitality mentioned by several of the subsequent speakers in describing their experiences in that country.

Miss B. J. Neal, sister tutor, and leader of the party to Denmark, was the first speaker, and she was followed by Miss R. A. Lucas, The Hospital for Sick Children, Great Ormond Street; Miss J. McEvoy, General Infirmary, Leeds; Miss J. A. Peel, Southlands Hospital, Shoreham-by-Sea; Miss M. Sharp, Royal Surrey County Hospital, Guildford; Miss A. H. B. Jarvis, Stracathro Hospital, Brechin, Angus. The last two speakers—Miss P. Littlecott, St. Thomas' Hospital and Miss M. Jenkins, University College Hospital—combined in a conversation piece, rather on the lines of a television interview. Throughout the speakers were confident and fluent, almost without exception easily audible, and were lively and interesting to listen to. Much amusement was caused by the chairman's difficulty over the Scottish names—but he was able to enjoy his revenge when the speakers attempted some tongue-twisting Danish names of people and places.

'Observations and Objectives'

SOME FIRST REACTIONS

by BRIAN V. WATKIN, S.R.N.

THE Royal College of Nursing's memorandum, *Observations and Objectives*, is a forward-looking document, but it has the right also to look back, with pride. Many of the points in it are analysed in greater detail in one or other of the policy documents which have preceded it over the years and added stature both to the Royal College itself and to the profession as a whole. It crystallizes the main trends in nursing thought as they apply to these changing times.

In the 'dynamic situation' of the health service today, the need for re-planning nursing policy is self-evident. Many of the aims of the Horder Reconstruction Committee have been realized, while the College comment on the Nuffield job analysis was an *ad hoc* document rather than a formal statement of policy.

The dominant motifs of the present memorandum are the nursing team, a better status for the assistant nurse, recognition for auxiliary personnel, the provision of leaders, wider paths of promotion, conditions of service consonant with high status, the nurse's part in policy-making and the initiation of research.

Next month College members from all parts will meet in conference to discuss these and other matters. I shall not be there. As a man, I am not eligible for College membership. I am reminded of Ogden Nash—

"I guess I am not really reprehensible,
Just dispensable."

Be that as it may, the discussions at the conference are bound to range more widely and probe more deeply than was possible in the limited compass of a policy statement, even with the superb draftsmanship of the College writers. I am not therefore going to carp at things left out—a self-denying ordinance of some magnitude! But there are some points which I hope will be thoroughly gone into next month.

Imaginative Ideas

The call for the establishment of a university degree course in nursing is something it is good to see as official policy. Then there is the imaginative idea of College fellowships, on the lines of those in the other royal colleges, and, above all, the announcement, in the final section, that the College is taking steps to establish an authoritative body to carry out research into the problems of the profession.

The need for further research was one of the things made most evident by the Nuffield Report and if nursing can demonstrate fully that it is capable of contributing to scientific knowledge and research, it will be a good thing for our professional status and our acceptance by academic people.

Unfortunately, before we cross these richly-ornamented bridges, we have to negotiate several more primitive structures.

On the bridge of pre-entry qualifications, we have remained too long poised over the raging torrent. Year after year, the General Nursing Council cries out to the Minister for rescue. Each year its pleas are ignored. The College rightly feels that the nursing profession has been in this ignominious position long enough.

Only by the Minister's surrender on this point can we have "from the beginning, clearer differentiation between training the numbers required to staff the nursing service and preparation for leadership."

A degree course is proposed, to include nurse training and allied social studies. Later, the College draws attention to overlap in some schemes of training at present, and the need to integrate them to provide "a complete, logical and consecutive experience for students in a comprehensive training, while at the same time avoiding overlap."

In 1955, the General Nursing Council approved 73 experimental schemes of training. All except one provided merely for the association of the training for two parts of the Register, with a reduction in the period of training normally required.

The remaining case was the St. Thomas's scheme for an integrated nursing/health visiting course with Southampton University. The Minister was concerned about the length of this course.

There does not seem to have been a very full or a very good use made of the Area Nurse Training Committees and the freedom given by the 1949 Act to experiment.

The Second Mile

The College recommends supplementing the G.N.C. syllabus with "extra-curricular discussions on professional adjustment". This is an interesting avenue. The General Nursing Council only prescribes minimum standards. There is no maximum. How far individual hospitals can expand their teaching over and above the syllabus depends largely upon finance, of course. Some forward-looking schools are already stepping out along the second mile. There is no reason why nursing progress in a nationalized hospital service should not continue to come largely from individual hospitals and schools of nursing.

Liaison between ward sister, district nurse, health visitor and occupational health nurse is another topic of importance. There have been many crocodile tears shed about lack of co-operation between the branches of the health service and so often the administrative structure is blamed, with too little attempt to make it work. Could any administrative structure make hospital doctors write the letters they should to their general practice and public health colleagues whose patients they are treating? If nurses can set a good example, some of the black sheep *may* sheepishly follow.

The Leaders

To switch back to hospital nursing. I wish someone would explain to me how the Royal College proposes, under the structure ultimately envisaged, to prepare all the leaders for the team nursing idea. I do not like to doubt the wisdom of the Royal College, but then I do not like to doubt my own arithmetic either.

If all the team leaders are to be State-registered nurses—or the latter-day equivalent—we are going to

need more. Yet the College proposes to reduce the numbers entering for full training. I should have thought the preparation of an up-graded Enrolled nurse for leadership at this basic level was the answer. The College would not propose to use two or three graduate nurses as team leaders under the ward sister, on a ward with a present trained complement of two—sister and staff nurse ?

Opportunity Missed ?

In one respect the memorandum is strongly unbalanced. In the mental hospitals are 44 per cent. of our hospital beds and 35 per cent. of our trained nursing staff. In this field problems at present loom more largely and menacingly than anywhere else in the National Health Service. Yet mental nursing is only mentioned once or twice in passing. No nurse can escape psychiatry today, even in a general hospital. The Horder Reports devoted considerable thought and space to mental nursing. It is surprising that the College has not seized this opportunity to take the lead in a field that surely needs one.

Looking back at previous policy documents and reports, it can be seen that their recommendations have not always been adopted. Those that have been taken up have often waited some time before they received their due.

Is there any way in which members of the coming conference can see that policy is not only thrashed out and formulated along sound lines, but applied ?

There are two approaches. Since the war, especially, the College has entrenched itself in a position where it can campaign in high quarters on matters that lie within the competence of central authority. The present report contains cogent arguments for the nurse's part as policy-maker.

Accreditation

There are other points of policy that are left largely to individual hospitals. If we are to speed up progress at the periphery, we must use the weapon placed in our hands a few weeks ago in a *Nursing Times* editorial—accreditation, long familiar across the Atlantic. If the Royal College of Nursing were to establish a list of accredited hospitals, hospitals which had risen above the statutory minimum required by the General Nursing Council, to a level satisfactory to professional leaders, its high prestige would make accreditation greatly sought after. It would be hard to find a more convenient weapon for the raising of standards and the chastisement of the sluggard committee.

THE COLLEGE COUNCIL MEETS

November 1956

PRESIDING at the meeting of the Royal College of Nursing Council on November 15, Mrs. A. A. Woodman, M.B.E., chairman, announced that 40 additional places for members wishing to attend the International Council of Nurses Congress in Rome had been received from the National Council of Nurses of Great Britain and Northern Ireland. These would be allocated as follows. Council members: England and Wales four, Scotland two, Northern Ireland one. Sections: one additional place each; four Metropolitan Branches one each; for Branches in the Northern, Midland and Eastern areas, five places each; in the West three, Wales three and Scotland four.

Miss F. N. Udell, O.B.E., gave a summary of decisions reached at the meeting of the Executive Council of the National Council of Nurses (this meeting was reported in the *Nursing Times* of November 2). Miss M. B. Powell, presenting the report of the Professional Association Committee, referred to the working party set up by the Minister of Health "to examine the extent to which the provision of convalescent homes in the National Health Service is meeting the demands placed upon it in the light of recent advances in medicine and modern conceptions of treatment and nursing care, to review the admissions machinery in the London area and to make recommendations." It was regretted that no nurse was included in the members of the working party and the Council agreed that representation on this matter should be made to the Minister of Health.

The Health Visitor

The Council received and approved the comments by the Education Committee and the Public Health Section respectively on the report of the Government Working Party on the Field of Work, Training and Recruitment of Health Visitors. The Education Committee had considered two main questions, the training of the health visitor and the function and training of senior health visitors. The Committee welcomed the statement of the health visitor's role as family visitor but they found the suggestions on her training disappointing.

The statements that the intending health visitor should be a State-registered nurse on the general part of the register, and that Part 1 midwifery training should be replaced by experience in obstetric nursing, were also welcomed, but attention was drawn to the suggestion that no records of the proposed alternative training need be kept, and recommendations were made.

Some disquiet was felt concerning the central training body although the suggestion that there should be on it a preponderance of professional and educational interests was welcomed. New duties would be laid upon the central training body, particularly that of inspection of training centres, and it was felt that this should be carried out by those with considerable experience in adult education as well as in the training of health visitor students.

Dealing with senior staff, the Working Party Report had confused the varying needs of administrator, teacher and consultant and, with the exception of the last, did not appear to consider any particular preparation necessary. This was particularly regretted as the Royal College of Nursing had been arranging courses for the last eight years for both administrative and tutorial staff in the public health field.

The suggestion of the introduction of a new grade—group adviser—would seem to be an attempt to compromise between several present needs without meeting any of them; such needs were (*a*) field work instructors, (*b*) health visitors specializing in group methods of health education, (*c*) experienced health visitors competent to advise colleagues on cases presenting a particular social

problem. Proposals were made by the Education Committee on advanced training, on experience required for senior positions, and also on the authority to whom the senior staff should be responsible.

The Public Health Section had welcomed the publication of the Report but commented on the recommendations which they found unacceptable. There was considerable concern over the persistent use of the word 'advice', which it was believed might lead to a misunderstanding of the health visitor's function by her colleagues in the local authority social services, and to a limitation of her duties. The Section considered that the case load suggested in the Working Party's Report was too high to allow for the health visitor to follow up her social work to a successful conclusion. Health visitors were well qualified to undertake social case-work and future planning should be directed towards means of enabling them to do so; the provision of transport and ancillary help were important factors affecting case loads and much could be done through good administration to ensure a satisfactory allocation of duties.

The Section was particularly pleased that it was so clearly stated in the Report that the health visitor is "truly a medico-social worker . . . playing a full part in both preventive medicine and social action". It was gratifying that the health visitor was accorded such full and proper status in an important Government document. The Section also wished to endorse in particular the Working Party's view that the health visitor "should be answerable to her own professional head and the latter, in turn, to the medical officer of health".

The Section was very perturbed regarding the suggested grade of group adviser, the recommendations regarding her function and training being unacceptable. While there would appear to be general agreement that Part 1 of the midwifery training was not a satisfactory preparation for the health visitor, opinions differed considerably with regard to alternative obstetrical training. Some members felt that Part 1 of the midwifery examination should be retained as an alternative obstetric qualification. The Section hoped that experiments in nurse training would make it possible for intending health visitors to qualify for both State registration and health visiting in less than the present four to four-and-a-half years, and it was hoped that experiments in integrated courses of training would be encouraged.

The Section also made recommendations with regard to the central training body, finance, recruitment and advanced training, salaries and conditions of service.

Applications of Heat

During the afternoon session the Council received representatives of the working party appointed to consider the nurse's responsibility in relation to applications of heat. This had been set up as a result of the tragic occurrence from time to time of burns caused to patients by the use of hot-water bottles. Mrs. H. M. Blair-Fish, Miss Ceris Jones, matron, The London Hospital, Miss R. Phillips and Miss B. Rees, ward sisters, University College and The Middlesex Hospitals respectively, presented the draft memorandum which dealt exhaustively with the measures for supplying warmth and heat in the care of all types of patients, from the premature infant to the aged. Considerable discussion ensued and as a number of suggestions were made and several items needed further clarification the Council agreed to refer the document for further consideration.

Miss M. E. Gould presented the draft memorandum on the nursing assistant working in mental and mental deficiency hospitals, prepared jointly by the Sister Tutor and Ward and Departmental Sisters Sections. The Council discussed this with reference both to the present situation (with in-service instruction already being given as recommended by the Ministry of Health circular HM(55)49), and to the objective envisaged by the College of a statutory roll for assistant mental nurses comparable with the General Nursing Council Roll for assistant nurses in general nursing. It was decided to arrange consultation between the joint sub-committee and representatives of the Council to consider the best action to take at this time.

Affiliated Organizations

A meeting of the representative committee of the four organizations affiliated to the College had been held on October 17 and a report was received by the Council.

The Association of British Paediatric Nurses was investigating the extent to which children were still being nursed in adult wards. A study tour in Holland in April had been most successful and another was planned.

The Society of Registered Male Nurses reported their annual conference held in London in September. The Society was seeking to obtain a seat on the Nurses and Midwives Whitley Council and activities on behalf of male nurses had been successful in various parts of the country and in Northern Ireland.

The National Association of State Enrolled Assistant Nurses reported the internal re-organization of the Association and successful meetings which had been held in London in May and in Manchester in October.

The Society of Mental Nurses reported an important conference to discuss the Manchester Mental Nursing Survey, at which 250 mental trained nurses were present.

The Council received the report and agreed that the possibility of further support to the affiliated organizations should be placed on the agenda of a future Council meeting.

Miss P. C. L. Gould presented the report of the Branches Standing Committee held in Llandudno on October 27 and spoke with appreciation of the generous hospitality and the enjoyable social occasions planned by Colwyn Bay, Llandudno and District Branch. The Redhill, Reigate and District Branch resolution on the minimum retirement age for pension was referred to the Professional Association Committee. The Edinburgh Branch resolution on washing facilities at railway stations was referred to the same committee and to the Public Health Section.

The Occupational Health Section announced the award of a scholarship of £250 to enable a member to take the Occupational Health Nursing Course at the College next year. Also the award of a scholarship of £350 to Miss D. M. White, sister-in-charge, Hygienic Wire Works Ltd., Mitcham, to study occupational health services to groups of industries in the United States and Canada.

Miss D. Melville, M.B.E., presenting the report of the Northern Ireland Committee, spoke of the successful conclusion of the Northern Ireland Appeal Fund. The Committee was concerned over the hazard of tuberculosis for nurses and had asked the Hospitals Authority to define their policy with regard to nurses who were proved to be negative reactors to Mantoux testing. A favourable decision had been given by the Local Appeal Tribunal to an appeal made by a pupil midwife member under the National Insurance (Industrial Injuries)—(Prescribed Diseases) (No. 38), who had claimed injuries benefit for contracting tuberculosis in the course of her duties.

A grant of £10 had been made to a member from the Mary S. Rundle Benevolent Fund.

The College headquarters would be closed for the Christmas holiday from December 22 to 26 inclusive.

The date of the next Council meeting is December 20.

HERE and THERE

OLD PEOPLE'S HOMES

MISS P. Hornsby-Smith, Parliamentary Secretary, Ministry of Health, opened two homes for old people in Birmingham recently. The foundation stone of one had been laid by Mr. Iain Macleod, then Minister of Health, last year. Miss Hornsby-Smith said that the progress made in England and Wales in the development of small homes for old people had been one of the features of local authority contribution to the social service in post-war years. Over 800 had been opened, and 76 were new buildings.

Voluntary organizations had not been far behind local authorities in the rate at which they had been opening up new homes each year, and their old people's clubs were a godsend. The efficacy of the statutory and voluntary domiciliary services was reflected in the fact that the bulk of admissions to residential homes was now from the very infirm older age groups.

PREVENTION OF HOME ACCIDENTS, NORTHERN IRELAND

FOR every seven children killed on the roads of Northern Ireland, 10 die from accidents in the home, states the Northern Ireland Ministry of Health and Local Government, which this week, in co-operation with local authorities, opens a campaign to prevent accidents in the home.

The Ministry states that annually over 2,000 people need hospital in-treatment and 25,000 outpatient treatment as a result of home accidents; the cost to public funds is about £150,000. In one hospital the number of beds occupied by such accident cases in 1955 represented the equivalent of 3,000 'patient days'.

County and county borough health authorities, chiefly through their medical, nursing and health visiting staffs, will give the main impetus to the campaign.

BLIND PERSONS IN EMPLOYMENT, SCOTLAND

MORE blind people than ever before in Scotland are at work in open employment—that is, holding their jobs in competition with people who have sight. This emerges from statistics (compiled by the Department of Health for Scotland) of blind people on the registers of local authorities as on March 31, 1956. The total number in employment, including those employed in special workshops for the blind, was 1,081. Employers with jobs within the capabilities of blind people are, statistics show, more and more inclined to give them the opportunity.

The number of registered blind people in Scotland on March 31, 1956, was 9,731, 11 fewer than last year. New registrations during the year totalled 1,196, which is the highest number on record. Of these, 64 per cent. were of people over 70. Children under 16 years of age who were registered as blind at March 31 numbered 223—19 more than in the previous year. Thirty of those newly registered were under five years old, nine being under one.

BROOK HOSPITAL. A 'staged' operation photographed in the reconstructed neurological theatre at the Brook Hospital, Shooters Hill, Woolwich.

ART EXHIBITION FOR CANCER RELIEF

AN exhibition of the work of some of the new artists is being held at 19/20, New Bond Street, London, W.1, in aid of the Cancer Relief Fund which exists to provide extra comforts, amenities and assistance for the poorer patients suffering from cancer. The pictures exhibited are offered for sale, the artists generously agreeing that a minimum of 25 per cent. of the proceeds shall go to the Fund. At the opening ceremony, performed by Lady Kilmuir, H.E. the Portuguese Ambassador was the first to purchase a picture—a typical London view. The pictures are in oils, water colour, pastel and black and white sketches; prices are moderate.

Adjoining the art exhibition, and also for sale, are a large number of Christmas toys, Christmas gifts and useful articles given by many firms for the benefit of the Fund. The exhibition is open daily until November 30, from 10 a.m. to 6 p.m. Admission free, but collecting-boxes are available.

I-H.N.C.F. AUTUMN RALLY

NURSES gathered in record numbers at Bridewell Hall, London, S.W.1, for the autumn rally of the Inter-Hospital Nurses' Christian Fellowship presided over by Miss M. Wilmshurst, president. A number of young nurses of the future, who had taken part in the pre-nursing houseparty in Florence Nightingale's old home in the summer, gave their witness to members of the profession for which they themselves hope to train.

A challenging message was given by A. J. Broomhall, Esq., M.R.C.S., L.R.C.P., of the China Inland Mission, O.M.F., on the words "as poor yet making many rich." The evening meeting was addressed by the Rev. J. E. Page, M.B.E. Missionary members of the fellowship and outgoing recruits gave their testimonies in brief messages.

CANCER EDUCATION CONFERENCE

A ONE-DAY conference on *Education of the Public regarding Cancer* arranged by the Central Council for Health Education, will be held in the Great Hall, B.M.A. House, (Tavistock House), Tavistock Square, London, W.C.1, on Thursday, January 24. The conference is intended for chairmen of health committees, medical officers of health and their staff, and other interested people.

The programme of lectures will be as follows: *The Present Position of the Prevention and Treatment of Cancer*, by Mr. R. W. Raven, O.B.E., T.D., F.R.C.S., surgeon, Royal Marsden Hospital; *Problems of Cancer Education*, by Dr. John Burton, medical director, Central Council for Health Education; *Cancer Education in Practice*, by Mr. John Wakefield, executive officer, Manchester Committee on Cancer.

HAROLD WOOD STUDENT NURSES. Mr. G. W. Lagden, M.P., on the terrace of the House of Commons with student nurses from Harold Wood Hospital, Essex, when he conducted them on a tour of the Houses of Parliament.

National Association of State Enrolled Assistant Nurses

WINTER CONFERENCE

THE annual dinner and winter conference of the National Association of State Enrolled Assistant Nurses were held in Manchester on October 30 and 31, by invitation of the Manchester Branch of the Association. A branch officers' conference was held on the afternoon of October 30.

The dinner at the Queen's Hotel was attended by 79 members and guests, who were received by the vice-chairman of Council, Miss A. M. Leest, and Miss C. E. Bentley, Association secretary.

Guests of the Association included Miss O. Ashford, nursing officer, Manchester Regional Hospital Board; Miss D. Biddle, president, Manchester Branch, N.A.S.E.A.N., matron, Booth Hall Children's Hospital; Dr. R. A. Blair, medical superintendent, Springfield Hospital, and Mrs. Blair, and Miss B. J. Wylie, chairman, Manchester Branch, Royal College of Nursing, matron, Manchester Royal Infirmary.

Miss R. Dreyer, president of the Association, presided at the dinner and proposed the Toast of 'The Queen, Duke of Lancaster'. 'The National Association of State Enrolled Assistant Nurses' was proposed by Miss B. J. Wylie, and 'Our Guests' was proposed by Mrs. A. M. Marr, chairman, Manchester Branch. Mr. C. Hall, Sheffield, kindly acted as toastmaster.

The winter conference was held in the Mayor's Parlour, Manchester Town Hall. Miss Dreyer, Miss Leest, Miss Biddle, Mrs. Marr and Miss Bentley accompanied the Lord Mayor, Councillor Harry Sharp, J.P., on the platform for the official opening of the conference. Introducing the Lord Mayor, Miss Dreyer underlined the gratitude of the Association to the Corporation of Manchester for the privilege of using the Mayor's Parlour for the conference and for the generosity which she understood had always been shown to the Manchester Branch in the matter of accommodation for its meetings; the Association was deeply appreciative too of having the Lord Mayor to open the conference, being aware of the many calls on his time.

Councillor Harry Sharp, in a delightfully informal address, stressed the importance of the human touch in nursing, drawing from his own experience as a patient to illustrate the point; he stressed the need for nurses to have a strong organization to support them.

The chairman of the Doncaster Branch, Mr. T. Brunt, presented a cheque for £75 to the president, a contribution from Doncaster members to Association funds.

Miss Biddle took the chair for the morning lecture, by Dr. R. A. Blair, medical superintendent, Springfield Hospital, on 'The Mental Disorders of the Aged'. Dr. Blair, in a very fully documented talk, outlined the magnitude of the problem and the steps which had been taken so far to deal with it. He hoped that more day hospitals could be established so that although the mentally ill received hospital treatment during the day, they returned to the care of their families at night and were not cut off from them. Dr. Blair quoted encouraging figures about the percentage of recoveries and answered many questions from the audience.

Miss Dreyer, president, National Association of State Enrolled Assistant Nurses, addressing the conference.

A choice of visits for members lay between Booth Hall Children's Hospital, Springfield Mental Hospital, the Wholesale Co-operative Society's Biscuit Works, Manchester Town Hall and the assistant nurse training school at Delaunay Hospital.

Miss Biddle again took the chair for the evening lecture, an interesting and very clearly presented talk on 'The Use and Abuse of Hypnotic Drugs' by Dr. D. Sumner, who stressed how much the nurse can do to induce sleep in patients without having recourse to drugs. Again many questions from the floor showed the keen interest of members.

A very appreciative vote of thanks to the Manchester Branch and all its members was proposed by Miss Leest, and seconded by Mrs. H. Rathbone, member of Council.

In Parliament

THE Nurses Bill, and the Nurses Agencies Bill, which consolidate the law relating to nurses and assistant nurses for the sick, and the law relating to agencies for the supply of nurses, were introduced and read a first time in the House of Lords on November 13.

Mr. Llywelyn Williams (Abertillery) asked the Minister of Health on November 12 how many voluntary patients were now in the mental hospitals of Wales.

Miss Hornsby-Smith replied.—The numbers are at present 2,784 voluntary and 5,734 certified patients. Hospital management committees report staff shortages of 181 nursing staff, 5 occupational therapists, 4 psychiatric social workers, 2 medical staff, 4 domestics and 11 others.

London Hospitals' Garden and Flower Competitions

TEACHING HOSPITALS

The Gardeners' Company Cup, The Middlesex Hospital; L.G.S. Silver Medal, The London Hospital; L.G.S. Silver Medal, St. Luke's-Woodside Hospital; L.G.S. Bronze Medal, Guy's Hospital.

NON-TEACHING HOSPITALS

Class A. The Gardeners' Company Cup and L.G.S. Silver Medal, South London Hospital for Women (South-West Region); L.G.S. Silver Medal, Finchley Memorial Hospital (North-West Region); L.G.S. Silver Medal, Langthorne Hospital (North-East Region); L.G.S. Bronze Medal, Ilford Isolation Hospital (North-East Region); L.G.S. Bronze Medal, St. John's Hospital, Twickenham (North-West Region); L.G.S. Bronze Medal, Fulham Hospital (South-West Region).

Class B. The Goldsmiths' Company Cup and L.G.S. Silver Medal, Hampstead Chest Clinic (North-West Region); L.G.S. Silver Medal, St. Matthew's Hospital, (North-East Region); L.G.S. Bronze Medal, Mildmay Mission Hospital (North-East Region); L.G.S. Bronze Medal, National Temperance Hospital (North-West Region).

R.S.H. 1957 Congress

The Royal Society of Health announces that the following have accepted office as presidents of sections and conferences at its annual health congress to be held at Folkestone from April 30-May 3, 1957.

SECTIONS

Hospitals: The Rt. Hon. Lord Inman of Knaresborough, P.C., J.P., chairman, Charing Cross Hospital. *Mental Health*: Dr. J. R. Rees, C.B.E., director, World Federation for Mental Health. *Occupational Health*: Dr. R. S. F. Schilling, reader in Occupational Health, University of London, president, Association of Industrial Medical Officers. *Preventive Medicine*: Sir Wilfred Fish, C.B.E., president, General Dental Council.

CONFERENCES

Domiciliary Nurses and Midwives: Miss L. J. Gray, county nursing officer, West Sussex C.C. *Health Visitors*: Miss Edna Jackson, deputy chief nursing officer, Ministry of Health. *Medical Officers of Health*: Dr. J. D. Kershaw, president, Society of Medical Officers of Health, medical officer of health, Colchester.

Coming Events

Chadwick Public Lectures.—*Clinical and Community Medicine* (Malcolm Morris Memorial Lecture), by J. N. Morris, M.A., M.R.C.P., D.P.H., in the lecture theatre, Wright-Fleming Institute, St. Mary's Hospital, Norfolk Place, London, W.2, on Thursday, December 6, at 5 p.m.

National Association of State Enrolled Assistant Nurses, South-West London Branch.—The next general meeting will be held at Fulham Hospital, St. Dunstan's Road, Hammersmith, on Wednesday, November 28, at 8 p.m.

The Nurses' Christian Movement.—A service of dedication in connection with the annual gift day will be held at the Methodist Missionary Society, 25, Marylebone Road, London, N.W.1, on November 30, at 7 p.m. Purses from N.C.M. branches will be received by Dame Elizabeth Cockayne, who will speak to the nurses. 6 p.m. Tea in the canteen.

The Royal Institute of Public Health and Hygiene.—*The Contribution of the Social Worker to the Community*, by H. D. Chalke, M.A., M.R.C.P., D.P.H., in the Lecture Hall of the Institute, 28, Portland Place, London, W.1, on Wednesday, December 5, at 3.30 p.m.

The Southern Hospital, Dartford, Kent.—The annual prizegiving will be held on Saturday, December 8, at 2.45 p.m. All past members of the staff are cordially invited.

Willesborough and Hothfield Hospital, Ashford, Kent.—The annual reunion and prizegiving is to be held at the Willesborough Section on Saturday, December 1, at 2.30 p.m. All past nurses are cordially invited.

Royal College of Nursing

Sister Tutor Section

Kent Sister Tutor Section within the Maidstone Branch.—The quarterly meeting will be held at the West Kent Hospital, Maidstone, on **Saturday, December 1,** at 3 p.m.

Sister Tutor Section within the North Western Metropolitan Branch.—A meeting to discuss *The Aims of Education*, with special reference to the potential student nurse, will be held at the Hospital for Sick Children, Great Ormond Street, on **January 30, 1957,** at 7 p.m. Four headmistresses, each from a different type of school, will speak, and there will be an open discussion. Tutors from other Branches will be very welcome.

Sister Tutor Section within the South Eastern Metropolitan Branch.—A meeting will be held at Lewisham Hospital, S.E.13, on **Monday, November 26,** at 7 p.m., preceded by an executive meeting at 6.30 p.m. A film, *Dust or Destiny*, will be shown. *Travel*: train to Ladywell Station; buses 47, 36, 69, 185, 108, 180, 54, pass the hospital.

Ward and Departmental Sisters Section

Ward and Departmental Sisters Section within the North Eastern Metropolitan Branch.—A general meeting will be held at the Connaught Hospital, Walthamstow, E.17, on **Wednesday, November 28,** at 7 p.m. followed at 7.45 p.m. by a talk by Miss A. M. Hevey, matron-in-chief, Prison Nursing Service. *Travel*: train from Liverpool Street to Hoe Street Station, Walthamstow; Central line to Leyton Station and trolley bus to Hoe Street Station; buses 38, 35; trolley buses 557, 581, 661; Green Line to Bell Corner, Walthamstow, and bus to Hoe Street Station.

Occupational Health Section

NEW GROUPS

On November 1, a new Occupational Health Group was formed in Southampton. Miss M. Goodridge, 3, Highfield Road, Southampton, agreed to serve as the group chairman and secretary and any members interested in future activities should write to Miss Goodridge.

On November 16 a meeting was held at Reckitt and Colman, Ltd., Norwich; Mrs. I. G. Doherty, secretary, Occupational Health Section, spoke about the work of the Section and the functions of a group. After discussion it was unanimously agreed to form the Norwich and Great Yarmouth Group. It will be remembered that Philippa Flowerday, the first industrial nurse to be appointed, was employed by Reckitt and Colman in 1878. Her duties were to assist the works doctor and visit sick employees in their own homes, taking them delicacies from the Colman kitchen.

AWARD OF SCHOLARSHIP

Miss D. M. White, sister-in-charge, Hygienic Wire Works, Ltd., Mitcham, Surrey, has been awarded the £350 scholarship offered by the Occupational Health Section to an experienced nurse to assist her to undertake advanced study in occupational health nursing in the United Kingdom or overseas. This is the first occasion on which a scholarship on these terms has been offered by the Section. Miss White is planning to visit the U.S.A. and Canada in 1957 where she will study the industrial health services available to groups of small industries.

Leicester Group.—The next meeting will be held in the managers' canteen, N. Corah (St. Margaret) Ltd., on **Tuesday, November 27,** at 8 p.m. Dr. James Hackbody, industrial medical officer, will speak on *The Industrial Nurse*. Members from other Sections will be welcome.

Branch Notices

Birmingham and Three Counties Branch.—Nomination papers for the Branch election are now available. Would members please apply to the secretary, Miss V. C. Whiter, Nuffield House, Queen Elizabeth Hospital, Birmingham 15, enclosing a stamp. Forms must be returned by Monday, December 17.

Brighton and Hove Branch.—An executive meeting will be held at the Royal Alexandra Hospital, Brighton, on **Wednesday, December 5,** at 7 p.m., followed at 7.30 p.m. by a general meeting.

North Eastern Metropolitan Branch.—One place has been allocated to the Branch by the College for the International Congress in Rome, 1957. Will any member who would like her name considered please write to Miss D. Browning, The London Hospital, E.1, not later than **Monday, November 26.**

Windsor, Slough, Maidenhead and District Branch.—A general meeting will be held at King Edward VII Hospital Nurses Home, Windsor (Bolton Road entrance), on **Thursday, November 29,** at 7.30 p.m.

Worthing and South West Sussex Branch.—A meeting will be held in the Welfare Centre, Town Hall, Worthing, on **Wednesday, November 28,** at 7.30 p.m., to receive the report of the Branches Standing Committee meeting, and nominations for hon. officers and committee, followed by a musical evening. There will be no meeting in December.

North Devon Combined Study Day

The combined study day held by the North Devon Branches of the Royal College of Nursing and the Royal College of Midwives recently was a great success. Members from the whole area attended in their dozens, to hear lecturers on a wide variety of subjects. These included 'The Early Diagnosis of Glaucoma' by Mr. John Ayoub, Moorfields Eye Hospital. The wonderful work that is being carried out in this country in this field of research is really remarkable. If such conditions can be dealt with before it becomes too late, we as a nation will have much to be thankful for.

During the afternoon a most illuminating talk was given by the county paediatrician, Dr. F. W. Brimblecombe, on 'The Physiology of the Newborn Infant'. The final lecture was given by Dr. R. Haddon, medical officer in charge of the radiotherapy unit at Exeter, on 'The Early Diagnosis of Cancer'. Dr. Haddon explained that if there really was an early diagnosis he would not be so busy trying to cure the patients who for some reason or another had not sought advice earlier. Nevertheless, great progress had been made in the field of research, and more patients were receiving treatment. Dr. Haddon showed many slides taken by himself of various stages of breast carcinoma, together with the results.

The day closed with a traditional tea-party and all members appeared to forget, for a time at least, glaucoma, newborns, and cancer, but none of them will forget what was a really successful study day.

ROYAL COLLEGE OF NURSING
HEADQUARTERS, LONDON:
Henrietta Place, Cavendish Sq., W.1
EDINBURGH: 44, Heriot Row
BELFAST: 6, College Gardens

Carols by Candlelight

at All Souls, Langham Place,
London, W.1
on **Tuesday, December 18,** at 7 p.m.
Cards of admission may be obtained from the secretary, North Western Metropolitan Branch, Royal College of Nursing, Room 496, Tavistock House, Tavistock Square, London, W.C.1. Please enclose a stamped addressed envelope.

Portsmouth Branch

After a general meeting held at the Royal Portsmouth Hospital, on Tuesday, November 13, members of the Portsmouth Branch enjoyed an interesting talk, given by Woman Police Constable Toone, on the work in the women's police services.

Scotland

ICN CONGRESS, ROME

If the number going to the International Council of Nurses Congress in Rome, 1957, is sufficient, it is hoped to arrange direct transport from Edinburgh or Glasgow to Rome. Would any Scottish or North of England nurses interested in joining this party communicate with Miss M. D. Stewart, Secretary, Scottish Board, Royal College of Nursing, as early as possible. It is hoped also to be able to arrange an 11-day tour following the congress, visiting Naples, Pompei, Amalfi, Sorrento, Castellamare, Rome, Florence, Venice, Milan.

STUDY DAY AT HEADQUARTERS

A well-attended conference of hon. office bearers of the Scottish Branches was held at 44, Heriot Row, Edinburgh, on Saturday, November 10. Many problems and difficulties were discussed and solutions found to them through the useful and helpful suggestions made by the group. As a result of the conference a closer relationship between the Scottish Board and the Branches in Scotland is anticipated in the future. The representatives were delighted to have with them on this occasion the general secretary-designate of the College, Miss C. M. Hall, who was paying a short visit to Scottish headquarters.

ROYAL COLLEGE OF NURSING APPEAL

for the Nation's Fund for Nurses

A glance at our lists of donations and gifts this week will show how much the young nurses of today care about their older colleagues. We thank all these nurses for their generous gifts and donations and everyone else who has helped to make these long lists.

Contributions for week ending November 17

	£	s.	d.
'In memory of Miss W. M. Furze'	2	2	0
The Misses R. M. and M. M. King, per Mrs. Brightwell. Money box	3	14	0

Rimmer, Weston-super-Mare Branch, College Member 14382, Luton and District Branch, Haslemere and District Hospital Student Nurses' Unit, Northampton General Hospital Student Nurses' Unit; Royal Masonic Hospital Student Nurses' Unit, Neath and Port Talbot Branch, Mrs. Seymer, Mrs. A. Hollington, and several anonymous donors including one 'in memory of Miss Colebrook'.

E. F. INGLE,
Secretary, Royal College of Nursing Appeal for the Nation's Fund for Nurses, 1a, Henrietta Place, Cavendish Square, London, W.1.

News in Brief

MATRON OF ST. DAVID'S HOSPITAL, CARDIFF, Miss Phyllis Smith, has retired after 36 years' nursing. At a farewell luncheon Miss Smith was presented with a canteen of cutlery.

A £10,000-SCHEME at St. Mary's Hospital, Leeds, for alterations to the administration block, which will convert the existing cubicle accommodation for nurses and sisters into proper bedrooms, has been approved by the Ministry of Health and is awaiting confirmation by Leeds Regional Hospital Board.

R.S.H. CONGRESS CHAIRMAN.—Dr. J. A. Scott, O.B.E., medical officer of health, London County Council, has been elected chairman of the Royal Society of Health's congress, meetings and publications committee for the coming year.

Scholarships

The British Red Cross Society is again offering two scholarships of £350 for the 1957/58 session, to British nurses for study outside the British Isles. A scholarship assists with tuition fees, board, lodging and incidental expenses, but does not include fares.

Application forms may be obtained from the Matron-in-Chief, B.R.C.S., 7, Grosvenor Crescent, London, S.W.1, to be returned by March 1, 1957.

Further particulars will be published next week.

Appointments

Manchester United Hospitals

MISS K. A. PARKER, S.R.N., S.T.DIP., Midwifery Pt. 1, has been appointed PRINCIPAL TUTOR to the preliminary training school, Manchester United Hospitals, at the Manchester Royal Infirmary. Miss Parker took her general training at the General Hospital, Birmingham, and her Part 1 midwifery at Leicester Royal Infirmary. She has been a nursing sister under the Colonial Nursing Service in Tanganyika; ward sister and sister tutor, Peace Memorial Hospital, Watford; sister tutor, University College Hospital, London, and sister tutor at St. Olave's Hospital, London.

General Nursing Council for England and Wales

THE 390th meeting of the General Nursing Council for England and Wales took place on October 26, with Miss M. J. Smyth, O.B.E., chairman, presiding. Approval of the Ministry of Health was reported of various experimental schemes of training already provisionally approved by the Council at their meeting on September 28, as follows: (i) Knowle Hospital, Fareham, and Royal South Hants Hospital, Southampton; (ii) Whitley Hospital, Coventry (combined shortened general and fever nursing training); (iii) Mendip Hospital, Wales; (iv) The Retreat, York; (v) Storthes Hall Hospital, Kirkburton, Nr. Huddersfield; (vi) Friern Hospital, N.11; (vii) Deva Hospital, Chester; (viii) Monyhull Hospital, Birmingham; (ix) Oakwood Hospital, Maidstone. Approval was also reported for a further five years of the combined course of general and sick children's nursing between the Children's Hospital, Birmingham, and Queen Elizabeth Hospital, Birmingham, or the General Hospital and the Women's Hospital, Birmingham.

Miss M. Houghton, education officer to the Council, was granted six days' leave of absence to act as external nurse examiner at the final examinations at University College Hospital, Ibadan, Nigeria.

The forecast of nurse training expenditure for the year ending March 31, 1958, to be forwarded to the Minister of Health for approval, was considered *in camera*.

It was agreed to seek the approval of the Minister for an increase in the establishment of inspectors of nurse training schools from five to seven.

Committees

The Finance Committee reported that Mr. Constable had been re-elected chairman for the ensuing year, and the Education and Examination Committee that Miss D. L. Holland had been re-elected to the chairmanship for the ensuing year; also that the following had been reappointed to a sub-committee to deal with matters arising out of the examinations: Miss Holland, Miss Darroch, Miss Marriott, Miss Price, Miss Raven (Miss M. J. Smyth and Miss Loveridge *ex officio*). On matters concerning nurse training expenditure, the following had been re-appointed to a sub-committee for the forthcoming year: Mr. Constable, Mr. Campbell, Miss Marriott, Mr. Hayhurst, Mr. West (Miss M. J. Smyth and Miss Loveridge *ex officio*). The following had been re-appointed to a sub-committee to consider applications for registration from nurses trained abroad and other applications requiring special consideration: Miss Raven, Miss Lawson, Miss Smaldon (Miss M. J. Smyth and Miss Loveridge *ex officio*).

It was reported that Miss K. A. Raven had been re-elected chairman of the Registration Committee, and that this committee had discussed with representatives of the Royal College of Nursing and the National Council of Nurses matters relating to the Minister's List of Foreign Trained Nurses and this matter would be further discussed by the committee at their next meeting.

The committee had considered the draft of the consolidated Nurses Regulations, 1956, introducing certain amendments, forwarded by the Ministry of Health for the Council's observations. The committee had drafted certain recommendations which the Council considered *in camera*.

Training School Rulings

The following changes were approved but without prejudice to the position and rights of any candidates already accepted for training.

Approval was withdrawn of the three-year scheme of general training between Chelsea Hospital for Women, S.W.3, and the Royal Free Hospital, W.C.1, at the request of the hospital authorities.

Full approval had been granted to the Nuffield Orthopaedic Centre, Oxford, to participate in three-year schemes of general training, and provisional approval to the Prince of Wales's Orthopaedic Hospital, Rhydlafar, Nr. Cardiff, to participate in a three-year scheme of general training had been extended for a further two years.

For Assistant Nurses

Approval was withdrawn of Park Hospital, Wellingborough, as a complete training school for assistant nurses.

Approval was withdrawn of Dutton Recovery Hospital, Warrington, to participate in a scheme of training for assistant nurses with Dutton Hospital, Warrington.

Provisional approval for two years was reported of a scheme of training for assistant nurses between the Women's Hospital, Liverpool, John Bagot Hospital, Liverpool, and a medical ward of the Heswall Branch of the Royal Liverpool Children's Hospital, Liverpool.

Provisional approval of the following as training schools for assistant nurses had been extended for a further two years: Neithrop Hospital, Banbury, with the War Memorial Hospital, Chipping Norton, and the District Hospital, Moreton-in-the-Marsh; Abingdon Hospital, Abingdon, with Avonside Hospital, Evesham; Surbiton General Hospital, Surbiton, with Barnes Hospital, S.W.14, and Tolworth Hospital, Tolworth.

Pre-nursing Courses

It was agreed that the one year whole-time course at Glendale Grammar School, Wood Green, Middlesex, be granted retrospective approval to September 1955 for the purposes of the entry of one specific candidate to Part 1 of the preliminary examination.

Disciplinary Cases

In accordance with Rule 38, the Registrar was directed to restore to the Register S.R.N. 79913. The Registrar was directed to remove from the Register the name of Percy George Albert Oak, S.R.N. 176256, and from the Roll of Assistant Nurses the name of Harold Salmon, S.E.A.N. 33281.

In accordance with Rule 33, Part VI of the Assistant Nurses Rules, the Registrar was directed to restore to the Roll of Assistant Nurses the name of S.E.A.N. 20427.

A new and logical treatment for coughs and colds

A decongestive salve, Thoracin, for the symptomatic relief of coughs, colds and respiratory disorders

It has long been known that a remedy for coughs and chest colds that would pass through the skin into the bloodstream would get to the seat of the trouble far more quickly than a remedy taken orally, and would also avoid digestive troubles.

Now a new product called Thoracin has been developed that will do this. Thoracin contains a new *ester* of guaiacol. This ester, being fat- and water-soluble, easily penetrates the skin, passes into the bloodstream and is quickly carried to the root of the trouble—the alveoli, bronchioles and bronchi of the lung.

Thoracin causes a vasodilation of the superficial skin vessels by the use of esters of nicotinic acid. It achieves the effect of the classic counter-irritant remedies—poultices, plasters and cupping—without irritation of the skin.

Thoracin also relieves reflex spasm of the pectoral muscles by the use of the tetrahydrofurfuryl-ester of salicylic acid. And it also brings to the alveoli via the bloodstream the sedative, antispasmodic and expectorant properties of camphor, eucalyptus, and guaiacol.

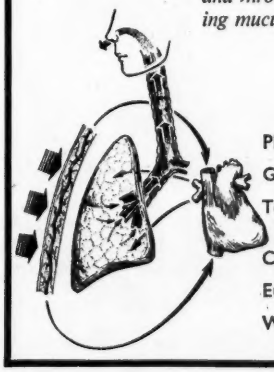
Especially suitable for children

Thoracin can be safely used on the most delicate skins, so it is particularly suitable for children. It is always easier to apply a soothing ointment locally to a child than to administer a dose of medicine. Thoracin is available in 1 oz. tubes, price 4/3. It is not advertised to the public. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low. The cream vanishes instantly and does not mark or stain clothing.

Rub in Thoracin, front and back. The skin will go red, due to vasodilation. This, of course, is painless and quite harmless, even to a child's sensitive skin. The esters are carried to the seat of the congestion, where they produce easement and relief from coughs and colds.

HOW THORACIN WORKS

The esters in Thoracin pass through the skin to the blood vessels and are carried to the heart and thus on to the lungs. Here they are excreted through the bronchial passages and come out in vaporized form through the nose and throat, easing congestion, loosening mucus and soothing irritation.



COMPOSITION

Phenyl Ethyl Nicotinate	2.0% w/w
Guaiacol Furoate	5.0% w/w
Tetrahydrofurfuryl Salicylate	10.0% w/w
Camphor	3.0% w/w
Eucalyptol	2.0% w/w
Water-Miscible Base to	100.0%

THORACIN

A CONVENIENT new remedy for coughs and colds

Made by the makers of Transvasin

NURSING SCHOOL NEWS

Queen Elizabeth Hospital for Children, Hackney

DAME KATHERINE WATT, D.B.E., R.R.C., was the guest of honour and formally declared open the new teaching department in a combined ceremony. Miss I G. Robertson, matron, welcomed Dame Katherine and in her report said that the nurses would now face added responsibility, which would increase their happiness in their work. "And if you have learnt the art of human relationships during your training—so important in all work—we shall be very happy to think that we have taught you this in addition to the nursing of the sick".

Mr. Bernard Jones, vice-chairman of the hospital management committee and chairman of the house committee, presented the awards, deputising for the chairman, Colonel Maitland.

Dame Katherine Watt congratulated the hospital on the new teaching department and she wished success and happiness to all nurses who would pass through the department in the future.

The number of State-registered children's nurses was limited, said Dame Katherine, and additional doubly trained nurses would be very welcome indeed.

Miss A. Maher was awarded the prize for the best all-round nurse of the year. The prize for senior hospital nursing was won by Miss W. S. Boston and Miss M. Stockings.

Willesden General Hospital

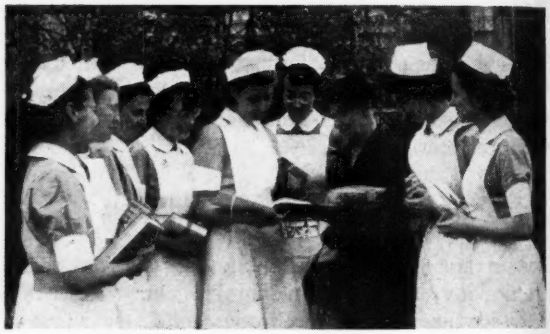
DAME Margot Fonteyn presented the awards, and in a delightful speech compared the arts of nursing and dancing. There were similarities in the approach to both professions, she said, and dancers and nurses shared a disciplined life involving hard work and a sense of dedication.

Miss E. C. Mills, matron, presented her report, and Mr. Maurice Orbach, M.P., chairman of the hospital management committee, said that the preliminary steps towards the building of a new outpatient department were being taken.

The gold medal was won by Miss Johanna Pohl, the Skene Memorial prize by Miss M. B. Lachenmann, and the senior theoretical nursing prize by Miss A. Barney and Miss H. A. M. van Lent, who also won the senior practical nursing prize.

Right: *WILLESDEN GENERAL HOSPITAL. Dame Margot Fonteyn and Miss J. Pohl, gold medallist.*

Above: *ST. RICHARD'S HOSPITAL, Chichester. Left to right: sister tutor; Miss V. R. M. Chapman, matron; the Duchess of Richmond and Gordon, and the Bishop of Chichester.*



Left: *WANSTEAD HOSPITAL, London. Third from left, matron and Miss M. M. Edwards, director, Division of Nursing, King Edward's Hospital Fund for London, who presented the awards. Miss M. Faupel won the silver medal.*

Above: *QUEEN ELIZABETH HOSPITAL FOR CHILDREN, Hackney. Dame Katherine Watt, who opened the new department, with prize-winners.*

Left: *ALDER HEY CHILDREN'S HOSPITAL, Liverpool. Dr. Edith Summerskill, P.C., M.P., presented the prizes. Miss S. C. Phillipson and Miss J. Paoletti won senior nursing prizes.*

Huddersfield Royal Infirmary

THE Mayor of Huddersfield presided and Miss M. L. Wenger, editor of the *Nursing Times*, presented the awards and addressed the nurses and guests. In her report Miss E. L. Long, matron, spoke of a busy year in the hospital, with increasing admissions and activity in all departments. During a schools' week groups from a number of schools had been shown round the hospital and special demonstrations had been planned for them. Requests had also been received from youth clubs and other schools. Two nurses had gone to Australia and three to Canada while a number had left to be married.

Miss M. Thurman won the gold medal and the gynaecology prize, Miss E. A. Bullock the silver medal and senior nursing prize, and Mr. E. S. Mountain the bronze medal.

Left: *HUDDERSFIELD ROYAL INFIRMARY. Miss M. L. Wenger, editor, 'Nursing Times', with prizewinners.*

Paddington Group Hospitals

THREE hospitals in the Paddington Group, St. Charles', Paddington General and the National Temperance, held their annual prizegiving at Porchester Hall, W.2. Miss Mary G. Milne, O.B.E., S.R.N., S.C.M., presented the prizes and certificates and in a characteristically good-humoured speech, told nurses to be enterprising and not to be content always to do things in the same old way; to join their professional organization and come forward for the rights of their profession. When one was tired and strained, she said, it was wise to draw apart and think.

Foreign and Commonwealth students from more than 12 countries were specially mentioned by Miss Blaiklock Large, S.R.N., S.C.M., principal tutor at St. Charles' Hospital. "If all nations could achieve harmony like our student nurses", she said, "the world would be a more peaceful place".

The Lawrence medals and prizes for the most outstanding nurses of the year were won by Miss M. A. Carty, S.R.N., of Paddington General Hospital, and Mr. E. E. Rule, S.R.N., St. Charles' Hospital.

Holloway Sanatorium, Virginia Water

SIR David K. Henderson, Professor Emeritus of Psychiatry, University of Edinburgh, was the guest of honour. Dr. R. Macdonald, physician superintendent, said that those unfamiliar with mental nurse training might be surprised to learn that in the middle of the 20th century we were still experimenting, and his hospital was particularly interested in combined training schemes. Mr. K. Newstead, principal tutor, gave a lively report of the work in the nurse training school. He referred appreciatively to the opportunity for mental hospitals to participate in a special section of the Agnes Gullan Trophy contest (the Agnes Pavey shield).

Miss K. Goodyear, matron, reported a most satisfactory recruitment situation. There were at present 70 students in training (48 per cent. more than in the previous year); the list for the December school was filling up rapidly and the only real problem was accommodation for the 100 students they hoped to admit next year.

Mr. F. Norbury, chief male nurse, said that wastage among the male nursing staff had been negligible for they were now able to be more selective in admitting students.

Sir David Henderson spoke of the pleasure it gave him to be "identified with this famous hospital because of the honour you have done me in naming a ward after me." He found in the hospital "an obviously happy relationship existing between the medical staff, nursing staff and nurse training staff." Referring to his experience at the Johns Hopkins Hospital in the United States, where the psychiatric clinic was staffed almost entirely by general trained nurses, Sir David said that this had convinced him, as long ago as 1912, that if the general trained nurse could be attracted to take part in psychiatric nursing, it would go far to solve problems in the mental hospitals. The advantage was not all on one side, for psychiatric nursing experience gave the general trained nurse added confidence and skill in handling patients if she returned to general nursing.

The medallists were Miss L. M. Case (who was also awarded prizes for the best nurse of the year, for psychiatry, and for first place in the hospital examinations), and Mrs. E. Y. Atkinson (who also received a prize as the best nurse of her year on completion of training). Matron's special prize was won by Miss K. Goodyear, and the chief male nurse's special prize was awarded to Mr. A. Currie. Miss M. E. Swift won the principal tutor's prize for the best preliminary training school student of the year.

Right: *HASLEMERE and DISTRICT HOSPITAL. Sir Geoffrey Todd, F.R.C.P., cutting the celebration cake, with prizewinners. Miss M. Gardner won the third-year first prize.*

The Royal London Homoeopathic Hospital

THE Hon. Lady Stockdale presented the awards at a charming ceremony. Dr. W. Lees Templeton in his report on the medical work stated that with the increase in the knowledge of medical science the work of the nurse was becoming more intricate. Mr. Stephen Power, M.S., said that in the near future the hospital hoped to acquire a new operating theatre and rehabilitation centre and at present the wards were being redecorated and would compare favourably with many of the larger London hospitals. Miss M. Hall Mackenzie, matron, also spoke.

Ten nurses received their certificates and the hospital prizes for homoeopathy were won by Miss P. Salmon, Miss R. Pugh and Miss G. von Bothmer. The two prizes for special merit in sympathy and kindness to patients and skill in practical nursing were won by Miss J. M. White and Miss von Bothmer.

PADDINGTON GROUP HOSPITALS. Prizewinners with, centre, Miss Mary G. Milne, who presented the prizes.

NORTH WEST METROPOLITAN REGIONAL HOSPITAL BOARD

North and West London, Bedfordshire and parts of Middlesex, Hertfordshire, Berkshire and Buckinghamshire

Applications are invited for the following appointments which should be sent, together with details of age, qualifications, training, experience and the names of two referees (or copies of two recent testimonials), TO THE MATRON OF THE APPROPRIATE HOSPITAL, unless otherwise stated, from whom further details may be obtained. National salary scales apply.

SOUTH-EAST METROPOLITAN REGIONAL HOSPITAL BOARD—Continued

STUDENT NURSE TRAINING

There are many Hospitals (including Mental Hospitals and Mental Deficiency Institutions) offering first class training facilities for young men and women to train as **STUDENT NURSES** and **PUPIL ASSISTANT NURSES.** These Hospitals are situated in South-East London, Kent and East Sussex (all within easy reach of London). Training normally lasts three years for Student Nurses and two years for Pupil Assistant Nurses and an allowance of between £260 and £285 a year is payable during training, less £119 for board, lodging and uniform. There is an additional allowance of £45 for Mental Nurse Training. If over 21 years of age, the allowance is between £390-£420 less £144 for board etc. if required. Applicants who wish to enter training should write to the South-East Metropolitan Regional Hospital Board, 11, Portland Place, W.1, stating at which Hospital or in which part of the Region they would like to train. All applications will be acknowledged and further details forwarded. If so desired an interview can be arranged with the Board's Nursing Officer.

About baby feeding-

HOW HEINZ STRAINED FOODS HELP

You can confidently recommend Heinz Strained Foods to mothers with young babies. They help to give the baby a fully balanced diet and offer convenience, with ease of preparation.

Heinz use the *freshest* vegetables and fruits. They cook and strain them under the most *carefully controlled* conditions, more hygienically than most mothers can, and with greater retention of food values.

For full details of the nutrient values of the 19 varieties of Heinz Strained Foods, write to Dept. 13S, H. J. Heinz Company Ltd., Harlesden, London, N.W.10.

Approved Suppliers to the Ministry of Health.

INDISPENSABLE

FOR WOUNDS, BURNS AND SKIN INFECTIONS

antipeol
CUTANEOUS OINTMENT

ANTIPEOL OINTMENT rapidly reduces inflammation. It contains the sterile broth filtrates of the most prevalent skin micro-organisms — staphylococcus, streptococcus, B. pyocyaneus — with a healing and soothing ointment base of lanoline, zinc and ichthammol.

ANTIPEOL is an invaluable and completely safe treatment for infectious conditions of the skin, mucous membranes and natural cavities.

The chief indications are: ABSCESSES, BOILS, BURNS, ECZEMA, ULCERS, IMPETIGO, HAEMORRHOIDS, SYCOSIS, WOUNDS AND ALL INFLAMMATORY CUTANEOUS INFECTIONS. ANTIPEOL LIQUID, the broth filtrate without the ointment base, is widely used for infections of the ear, for septic cavities and suppurating wounds.

Produced by the makers of:
ENTEROFAGOS *for intestinal complaints:*
RHINO-ANTIPEOL *for naso-pharynx infections:*
OPHTHALMO-ANTIPEOL *for ocular infections:*
DETENSYL *for reducing arterial tension.*

Her pains cost her job after job

"I am a secretary, but I lost job after job because I just could not keep going at 'certain times'. I simply could not concentrate because of my fearful headaches and the dull, aching pain. I seemed always to let the firm down—and my colleagues—when I could least be spared. I was sick and tired of the uncertainty, but did not know it was all so unnecessary until a married friend told me about Anti-Kamnia and gave me a couple to try. Now, they call me 'Old Reliable'. I am never off my job. One week is as good as another, always bright and cheerful".

There is nothing better than Anti-Kamnia for women who suffer badly from periodical pains and headaches. It is a unique formula, containing no aspirin, and is especially good for the immediate relief of these distressing symptoms. Cannot affect the heart or digestion, but quickly soothes away all pain. Two Anti-Kamnia Tablets usually are sufficient to bring immediate, sweet relief. Just ask your chemist for "A-K." tablets.

Second Reprint now issued

MEETING AND SPEAKING

A series of six articles based on a course of lectures given to members of the Royal College of Nursing, arranged jointly by the Public Health and Occupational Health Sections

by

MARJORIE HELLIER, L.G.S.M.
(formerly of the Old Vic)
